

# BE LIKE WATER

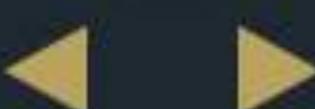

Applying Bruce Lee's philosophy to web design

# Bruce Lee

李小龍

**“Be formless, shapeless, like water. Now you put water into a cup, it becomes the cup. You put water into a bottle, it becomes the bottle. You put it in a teapot, it becomes the teapot. Now water can flow, or it can crash. Be water, my friend.”**

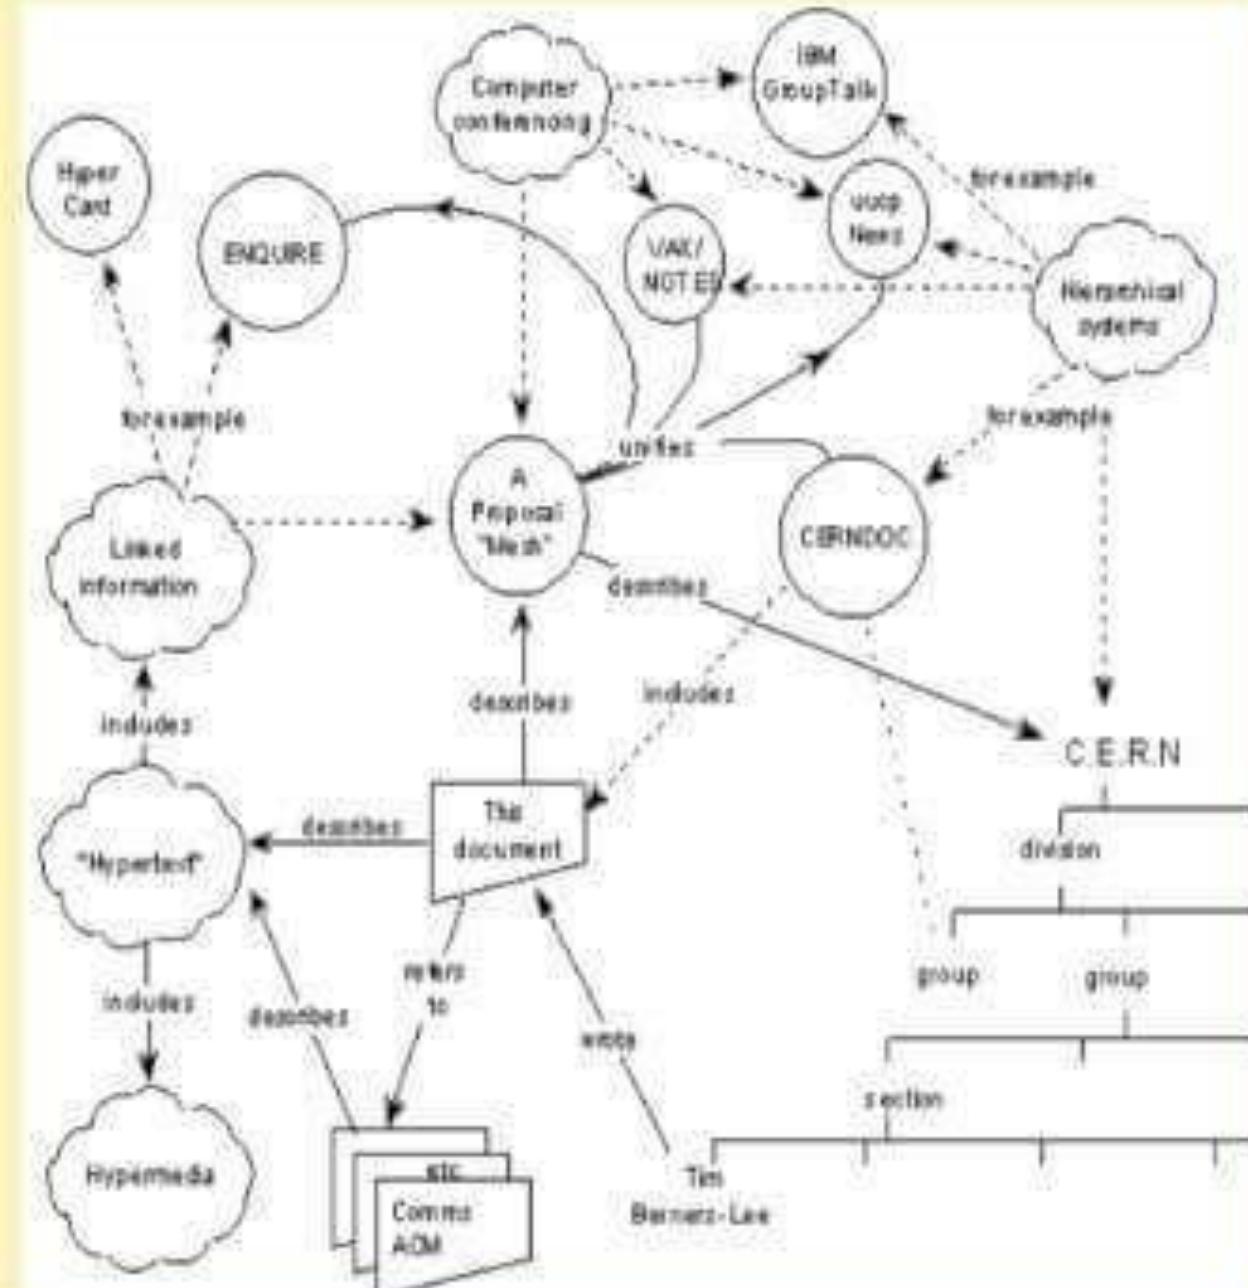

—Bruce Lee

# **Information Management: A Proposal**

*Tim Berners-Lee, CERN  
March 1989, May 1990*

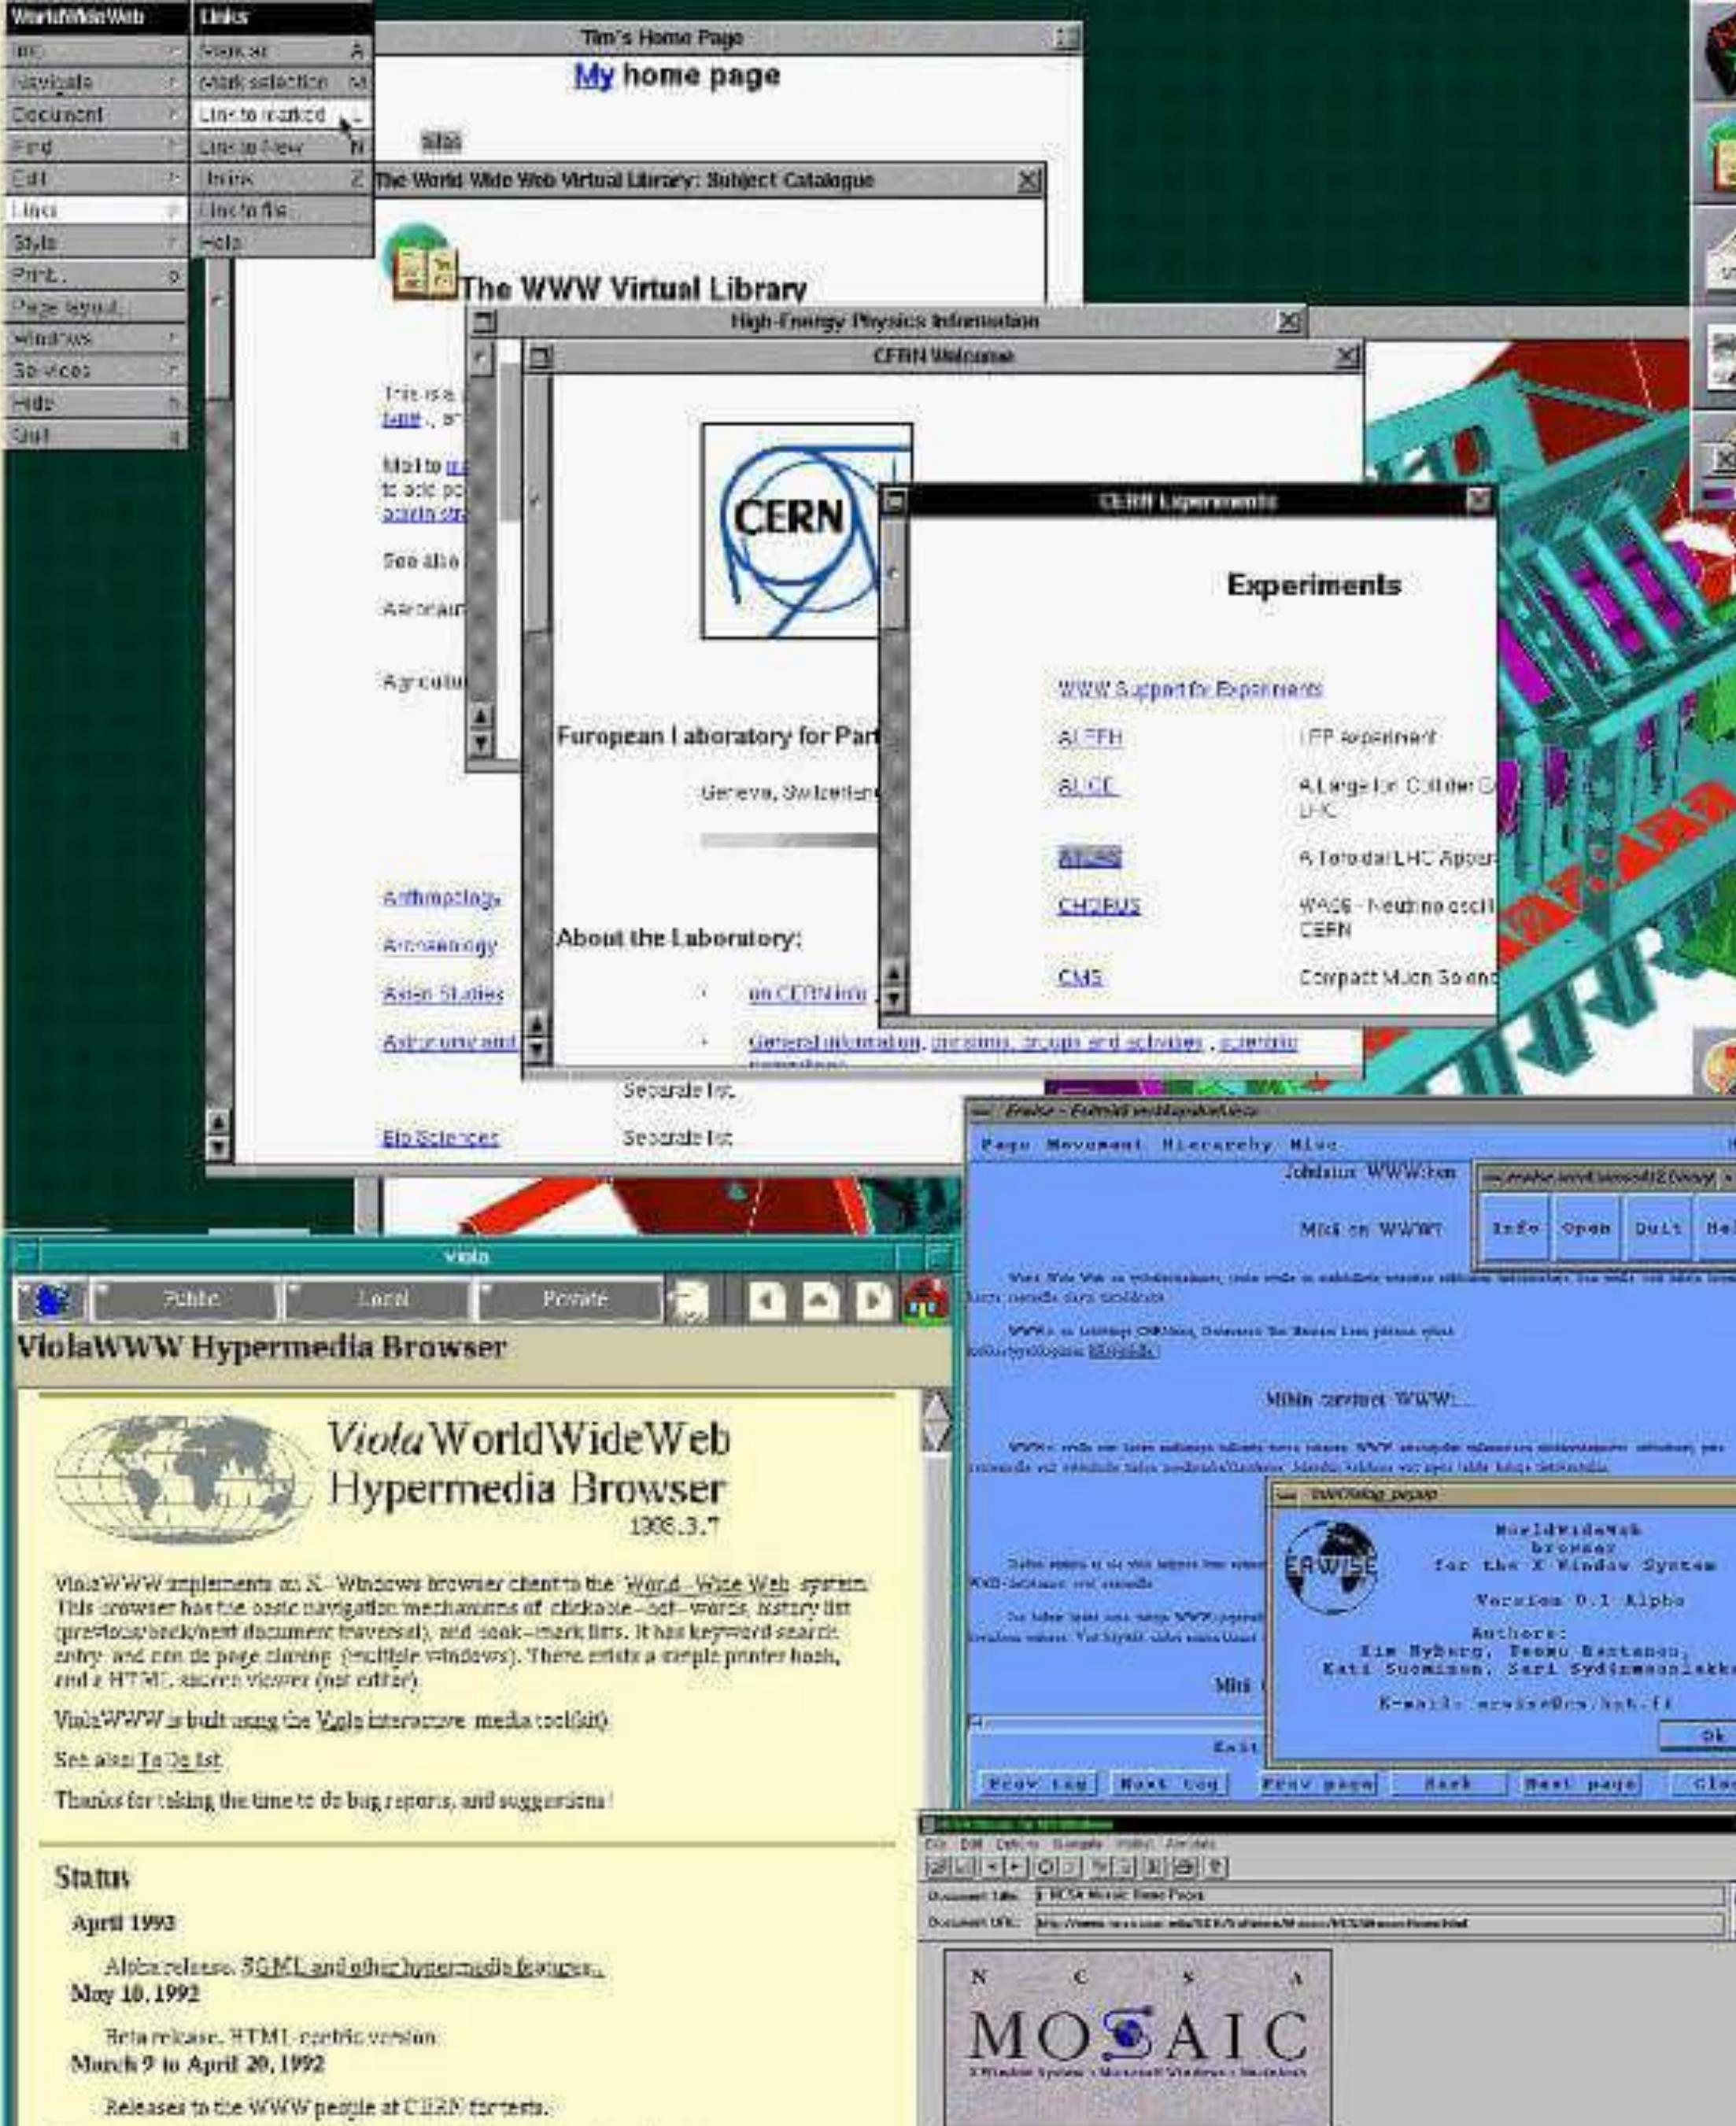

This proposal concerns the management of general information about accelerators and experiments at CERN. It discusses the problems of loss of information about complex evolving systems and derives a solution based on a distributed hypertext system.

## Overview

Many of the discussions of the future at CERN and the LHC era end with the question - "Yes, but how will we ever keep track of such a large project?" This proposal provides an answer to such questions. Firstly, it discusses the problem of information access at CERN. Then, it introduces the idea of linked information systems, and compares them with less flexible ways of finding information.

It then summarises my short experience with non-linear text systems known as "hypertext", describes what CERN needs from

# Cascading HTML style sheets -- a proposal

Håkon W Lie  
howcome@info.cern.ch  
10 Oct 1994

v0.92 This document describes work in progress and is incomplete as a basis for implementation. Its primary purpose is to establish guiding principles and propose a level of functionality for HTML style sheets. Comments are solicited.

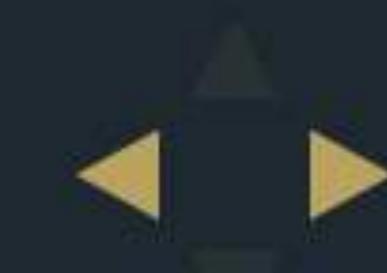

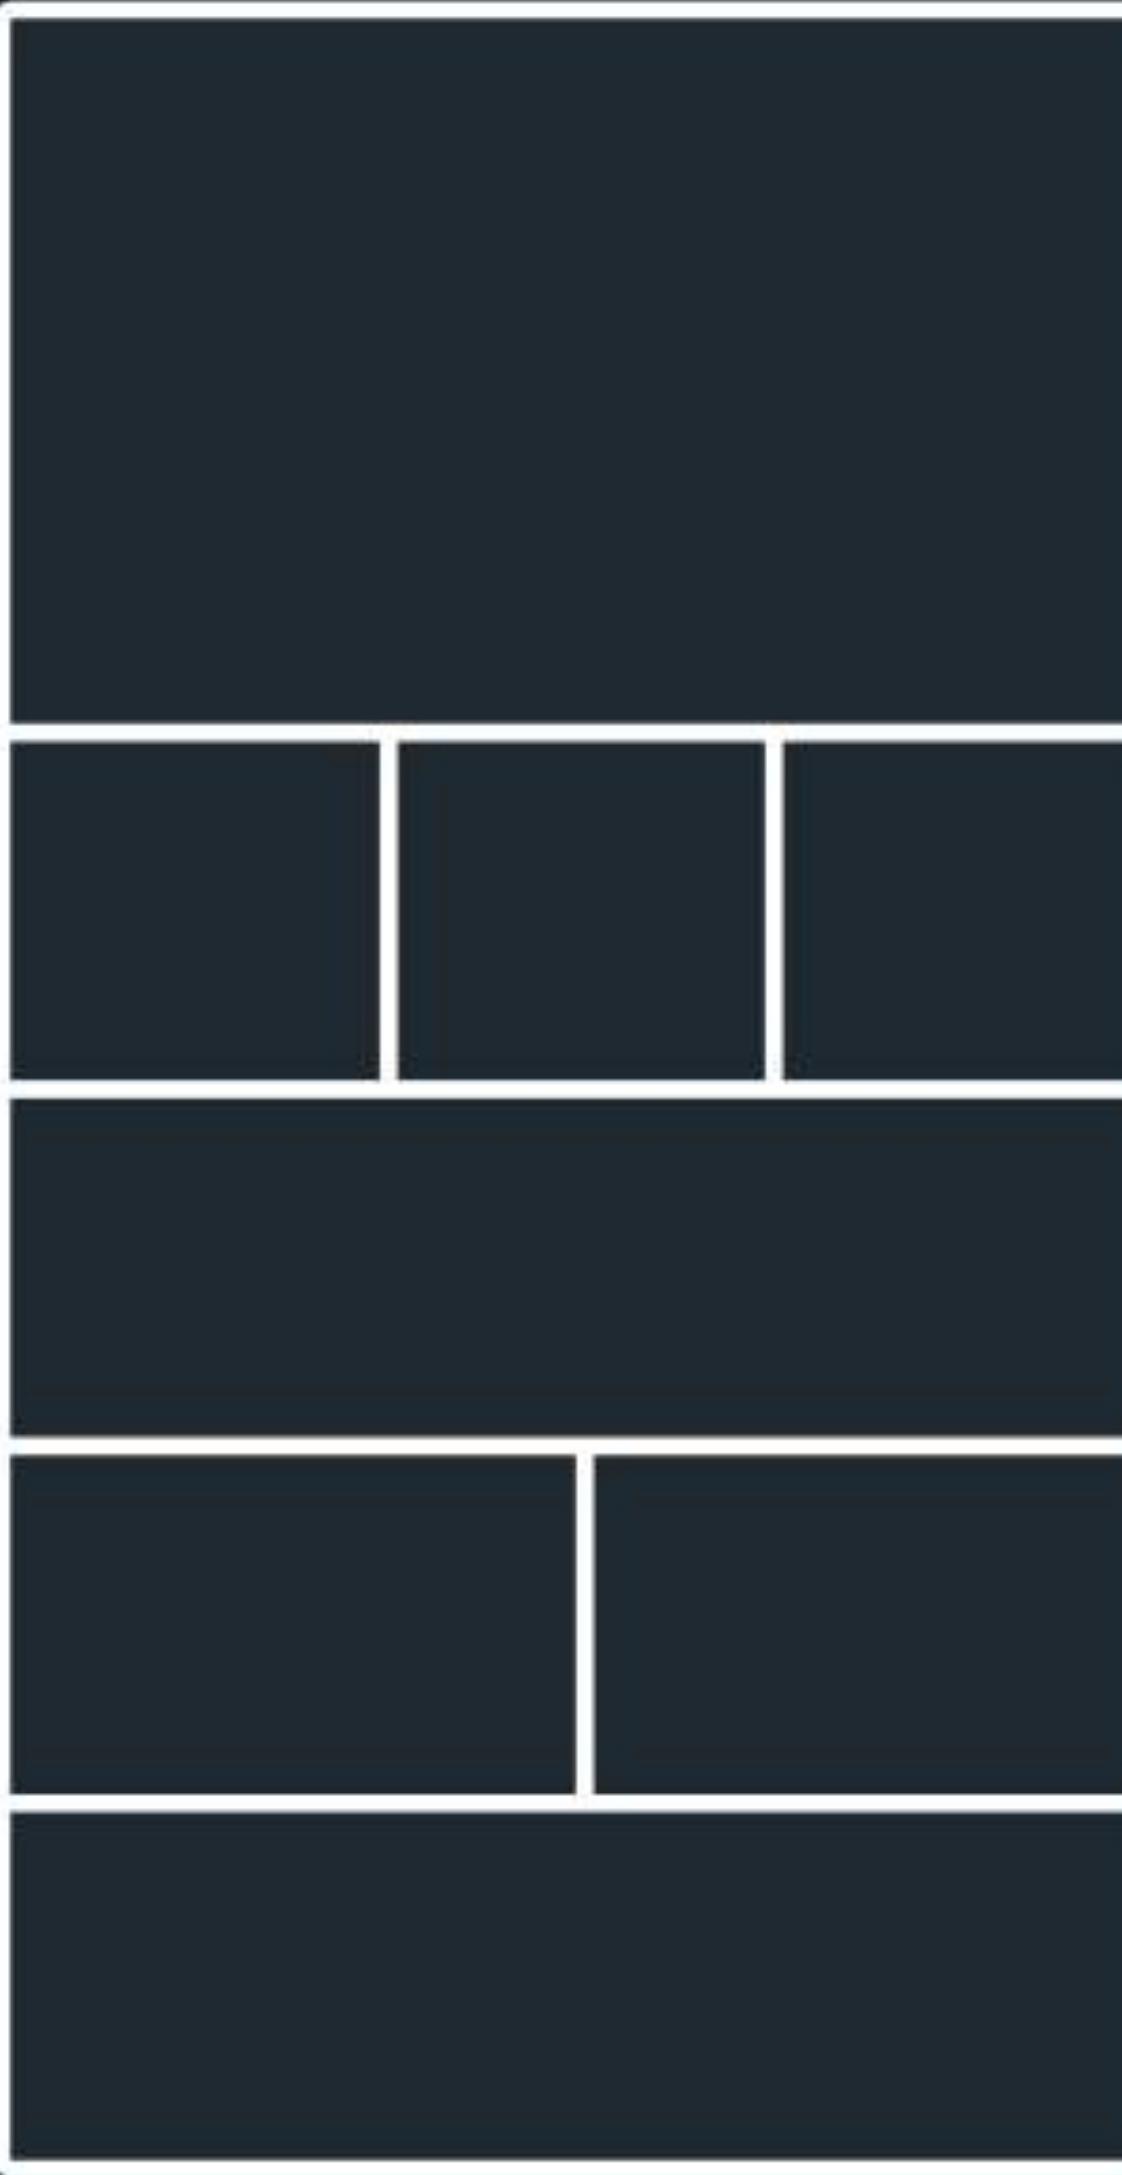

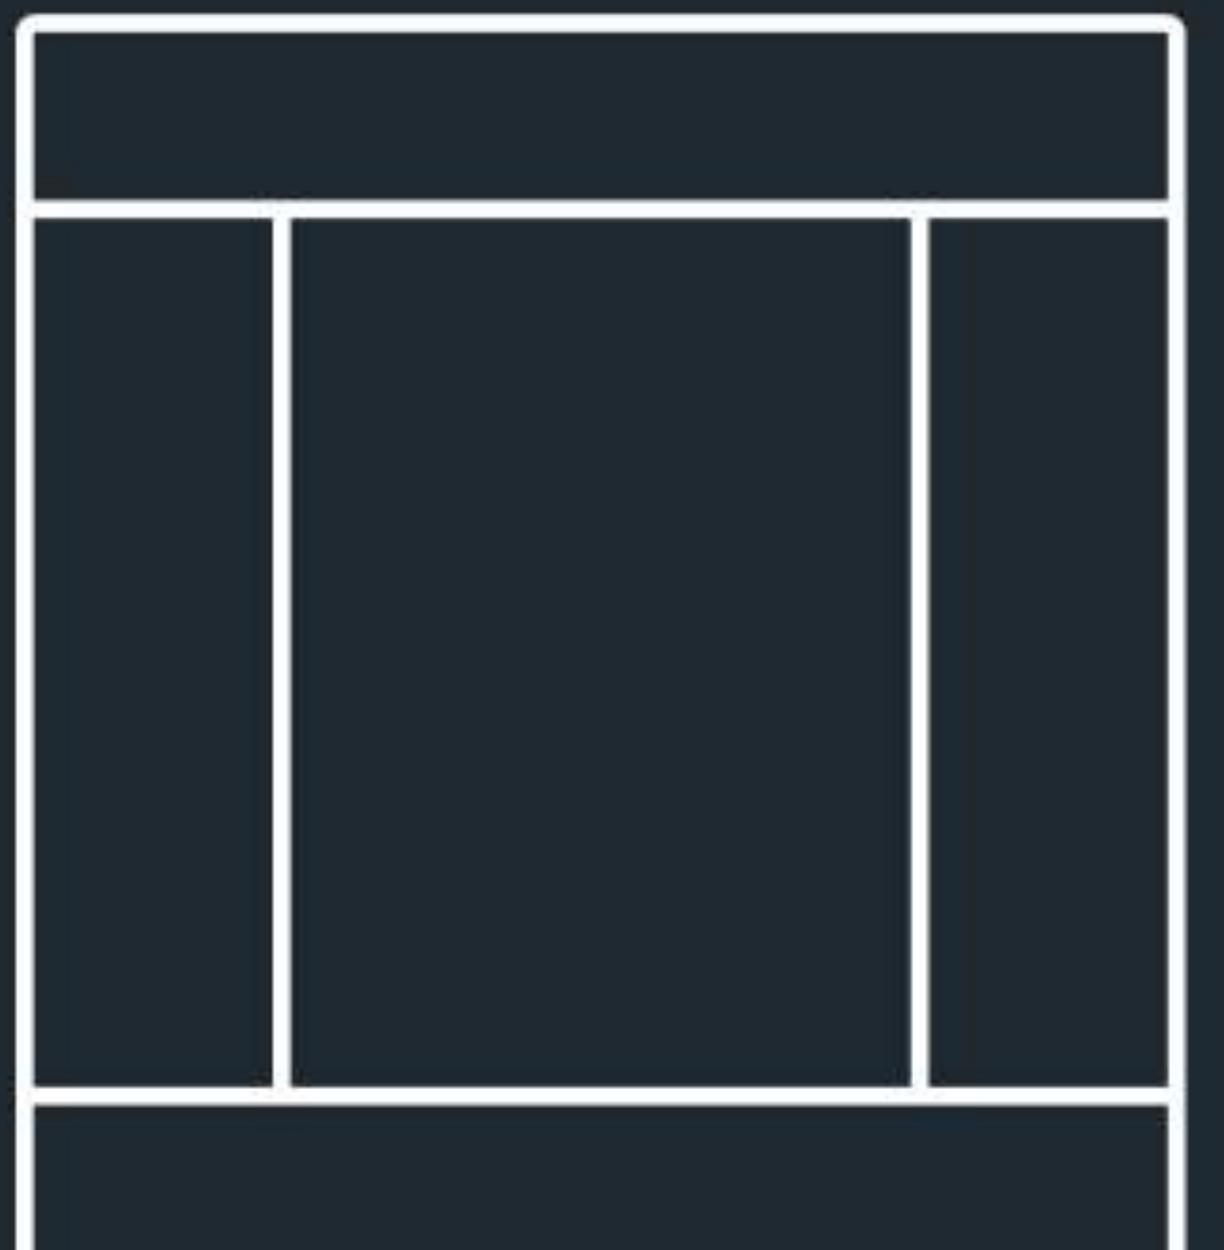

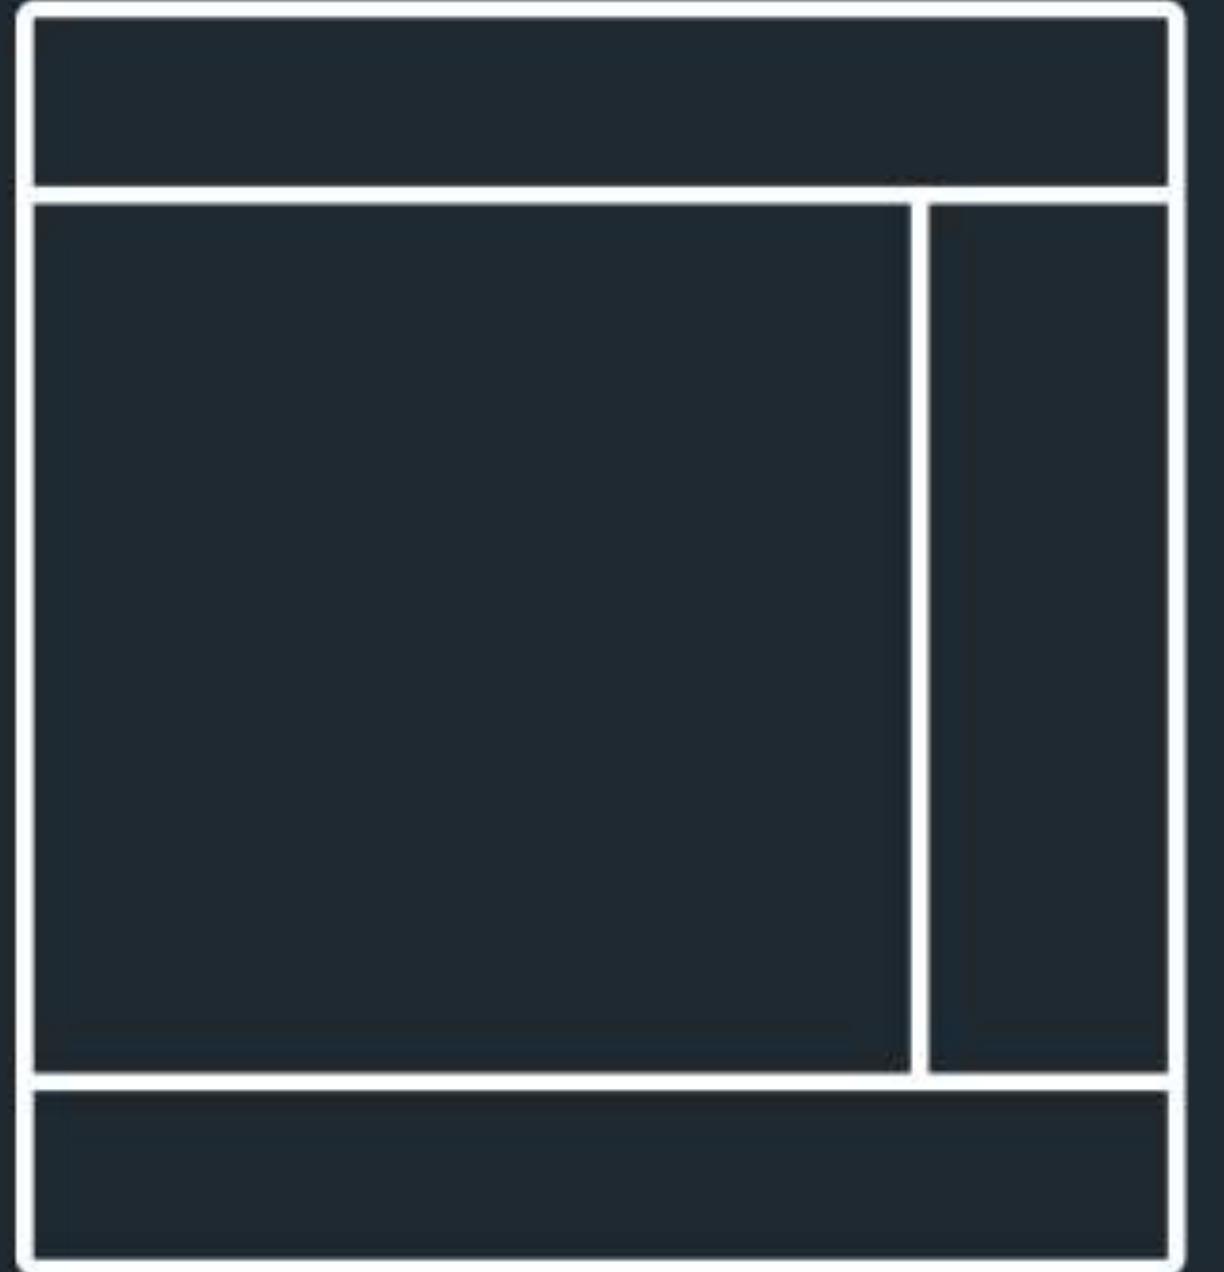

## Abstract

This document proposes a style sheet scheme for HTML documents. The proposed scheme provides a simple mapping between HTML elements and presentation hints. Properties like font family and window size can be suggested by the style sheet, and it can also provide logic to make presentation decisions based on the user's environment; e.g. the size of the screen or the current date.

The style sheet scheme is designed so that style sheets can be cascaded; the user/browser specifies initial preferences and hands the remaining influence over to the style sheets referenced in the incoming document. This will provide publishers with stylistic influence without resorting to page description languages.

The scheme supports visual as well as non-visual media.

## try try

labels. im bored at home. still haven done my essay. hahaa.  
later im going to eat eat and eat.  
im hungry. now. point is, even if im not hungry and feeling full, i still  
feel like eating. hahaa. druh.  
listening to latto songs.  
i hate school. i dont have a new school bag. so sad. aots.  
and i spent like on new bball shoes. will get it back though, but not on  
soon. ritus? hahaa.  
but all the rest of whatever i had.  
and i own laudi \$65. stupid hospital. charge me for what. nich.  
im broke. not a tall? yes.  
im going to save next year. ps. i wont have much time to go out  
anyways.

clap back.. q is happy. CLAPS.

i know that reason has nothing to do with me. not true the same year.  
(now i am i am. lolala. shap. hah).

that strength guy is hopeless. really.  
dope and mommy's boy. and now. WAAAHAWAHAHAHS.  
ok. get story behind one. then tell u guys. damn Barry. wohhhs

gah. bye bye.

POSTED BY PEART AT 9:56 AM · 6 COMMENTS

sleep...

i walked during trng.

Lower next year. im going to beat you up till its up to lastly standard  
every morning trng.

trng was... god!! morning trng first then:

i threw my temper. and i. myself. x. everyone else  
why? cos i had a... eh. team. of 2-1/2-4/3-3/3-3/3  
(i dun admit that i suck but i cant possibly go against 3 cos? a sucker  
not one 3 per sej?)  
is kidding me?

and then. ok. im sorry open. that my first mistake. will be my last.  
sorry. really.  
eh. and i wanna see a real team. hahaa. always a first to see the after i.  
but hate one. or now. i doubt i can be first. so i shall be one of the earlier  
ones.

damn it i screwed.

T dancing away 8:45 pm ;

lei.. aiyeh there's nothing much to update these days. like what do you expect me to type when i'm totally rotting at home all day mugging maths and reading some articles for GPF alight!

well.. im just dropping by to say hi anyways.. haha =)

oh well anyway i think yin cha yang cuo is crap.. but nvm i like it cos its too crap haos so much so that its damn funny.. haha.. even the funeral scenes are funny... oooops =x

[PS: other than adding this crap post i changed my wishlist and updated the calendar and my fave songs list as well.. haha check them out. if you want to that is =.= ]

sunday, may 29, 2005

I love angels brought me more & made your movement is independence day - CHERIE me

T dancing away 8:52 pm ;

for those who are interested, my class lost the captain's belts finals to 37/04, but never mind cos after all its still great to be overall 2nd in the entire level out of 37 classes. i mean.. compare it to being placed at some kuku position 2/37 is actually very good items right? =)

after tt went eat mcdonalds, got served by a noobie cashier with low efficiency. bought that b翔ang "Best Male Hits" cd with the extra value meal for an extra \$3. Oh wells here is the tracklist:

1. Good Charlotte - Lifestyles Of The Rich And Famous
2. Switchfoot - Heard To Live!
3. Rooster - Come Get Some
4. John Legend - Don't You Worry Bout A Thing
5. Guy Sebastian - Angels Brought Me Here

and it comes with some spastic big mac game + screen saver + wallpaper + cursor.

ooo sounds so exciting.. but actuall i havent listened to the cd yet nor played the game or anything yet =.=

watched "cellular" on VCD last night and i have to say that it's

actually quite good.. hehe.. but i still feel that the tempo could be

higher.. but the climax very jinhzhang haha..

## SPORTS (can't do any)

Top 10 sports in Singapore (2004)

Let's see, many things happened for the past 10 weeks, but since I can't remember the chronology, I'll just crap about what I did for the past 10 weeks!

This term was the sports season (Sports is an integral part of college life" - TJC 2004 Yearbook) and surprisingly my college managed to be in most of the sports and stuff!

Let's see if I can remember...

Tennis - top 5

Croquet - top 5

Tennis - Sorry Shama better luck in uni tennis!

Squash - eh this term mad?

Hockey - somewhere in the top 10 (there are only 16 JCs in Singapore... and counting)

Rugby - no idea

Swimming, Sailing, Track and Field, Rock Climbing - ongoing or not yet start.

...

Can't remember the other teams...

Anyway then there's our college's pride and joy (not that the others aren't... don't mindshovelself) -

† All three made it to the finale!

The college decided to chauffeur us to the stadium to watch the finale. The volleyball final was the first. Initially, the college only invited a few classes to attend. It was against Nanyang JC.

The turn out for our college was terrible (compared to Nanyang JC). The previously volleyball girls free involving Nanyang JC and during JC who consist of many enthusiasts. Among others (not that their mascot is a test but since the tad-park is at during...) 2 people went angry hopt!

Unfortunately, we lost to Nanyang JC... but honestly... kinda trashed kia kau! Lost three sets in A ROW! But it was a good game - saw some good serving!

From my sidebar

Index

# The “Holy Grail” layout

This screenshot shows a website with a complex, multi-column layout. On the left, there's a vertical sidebar with a yellow header "Education" and several sections like "Education News", "Education Resources", and "Education Tools". Below these are sections for "For Students" and "For Teachers". In the center, there's a main content area with a large yellow box containing text and images. To the right, there are more columns for "Education News", "Education Resources", and "Education Tools". At the bottom, there's a pink footer with links like "About Us", "Contact Us", and "Feedback".

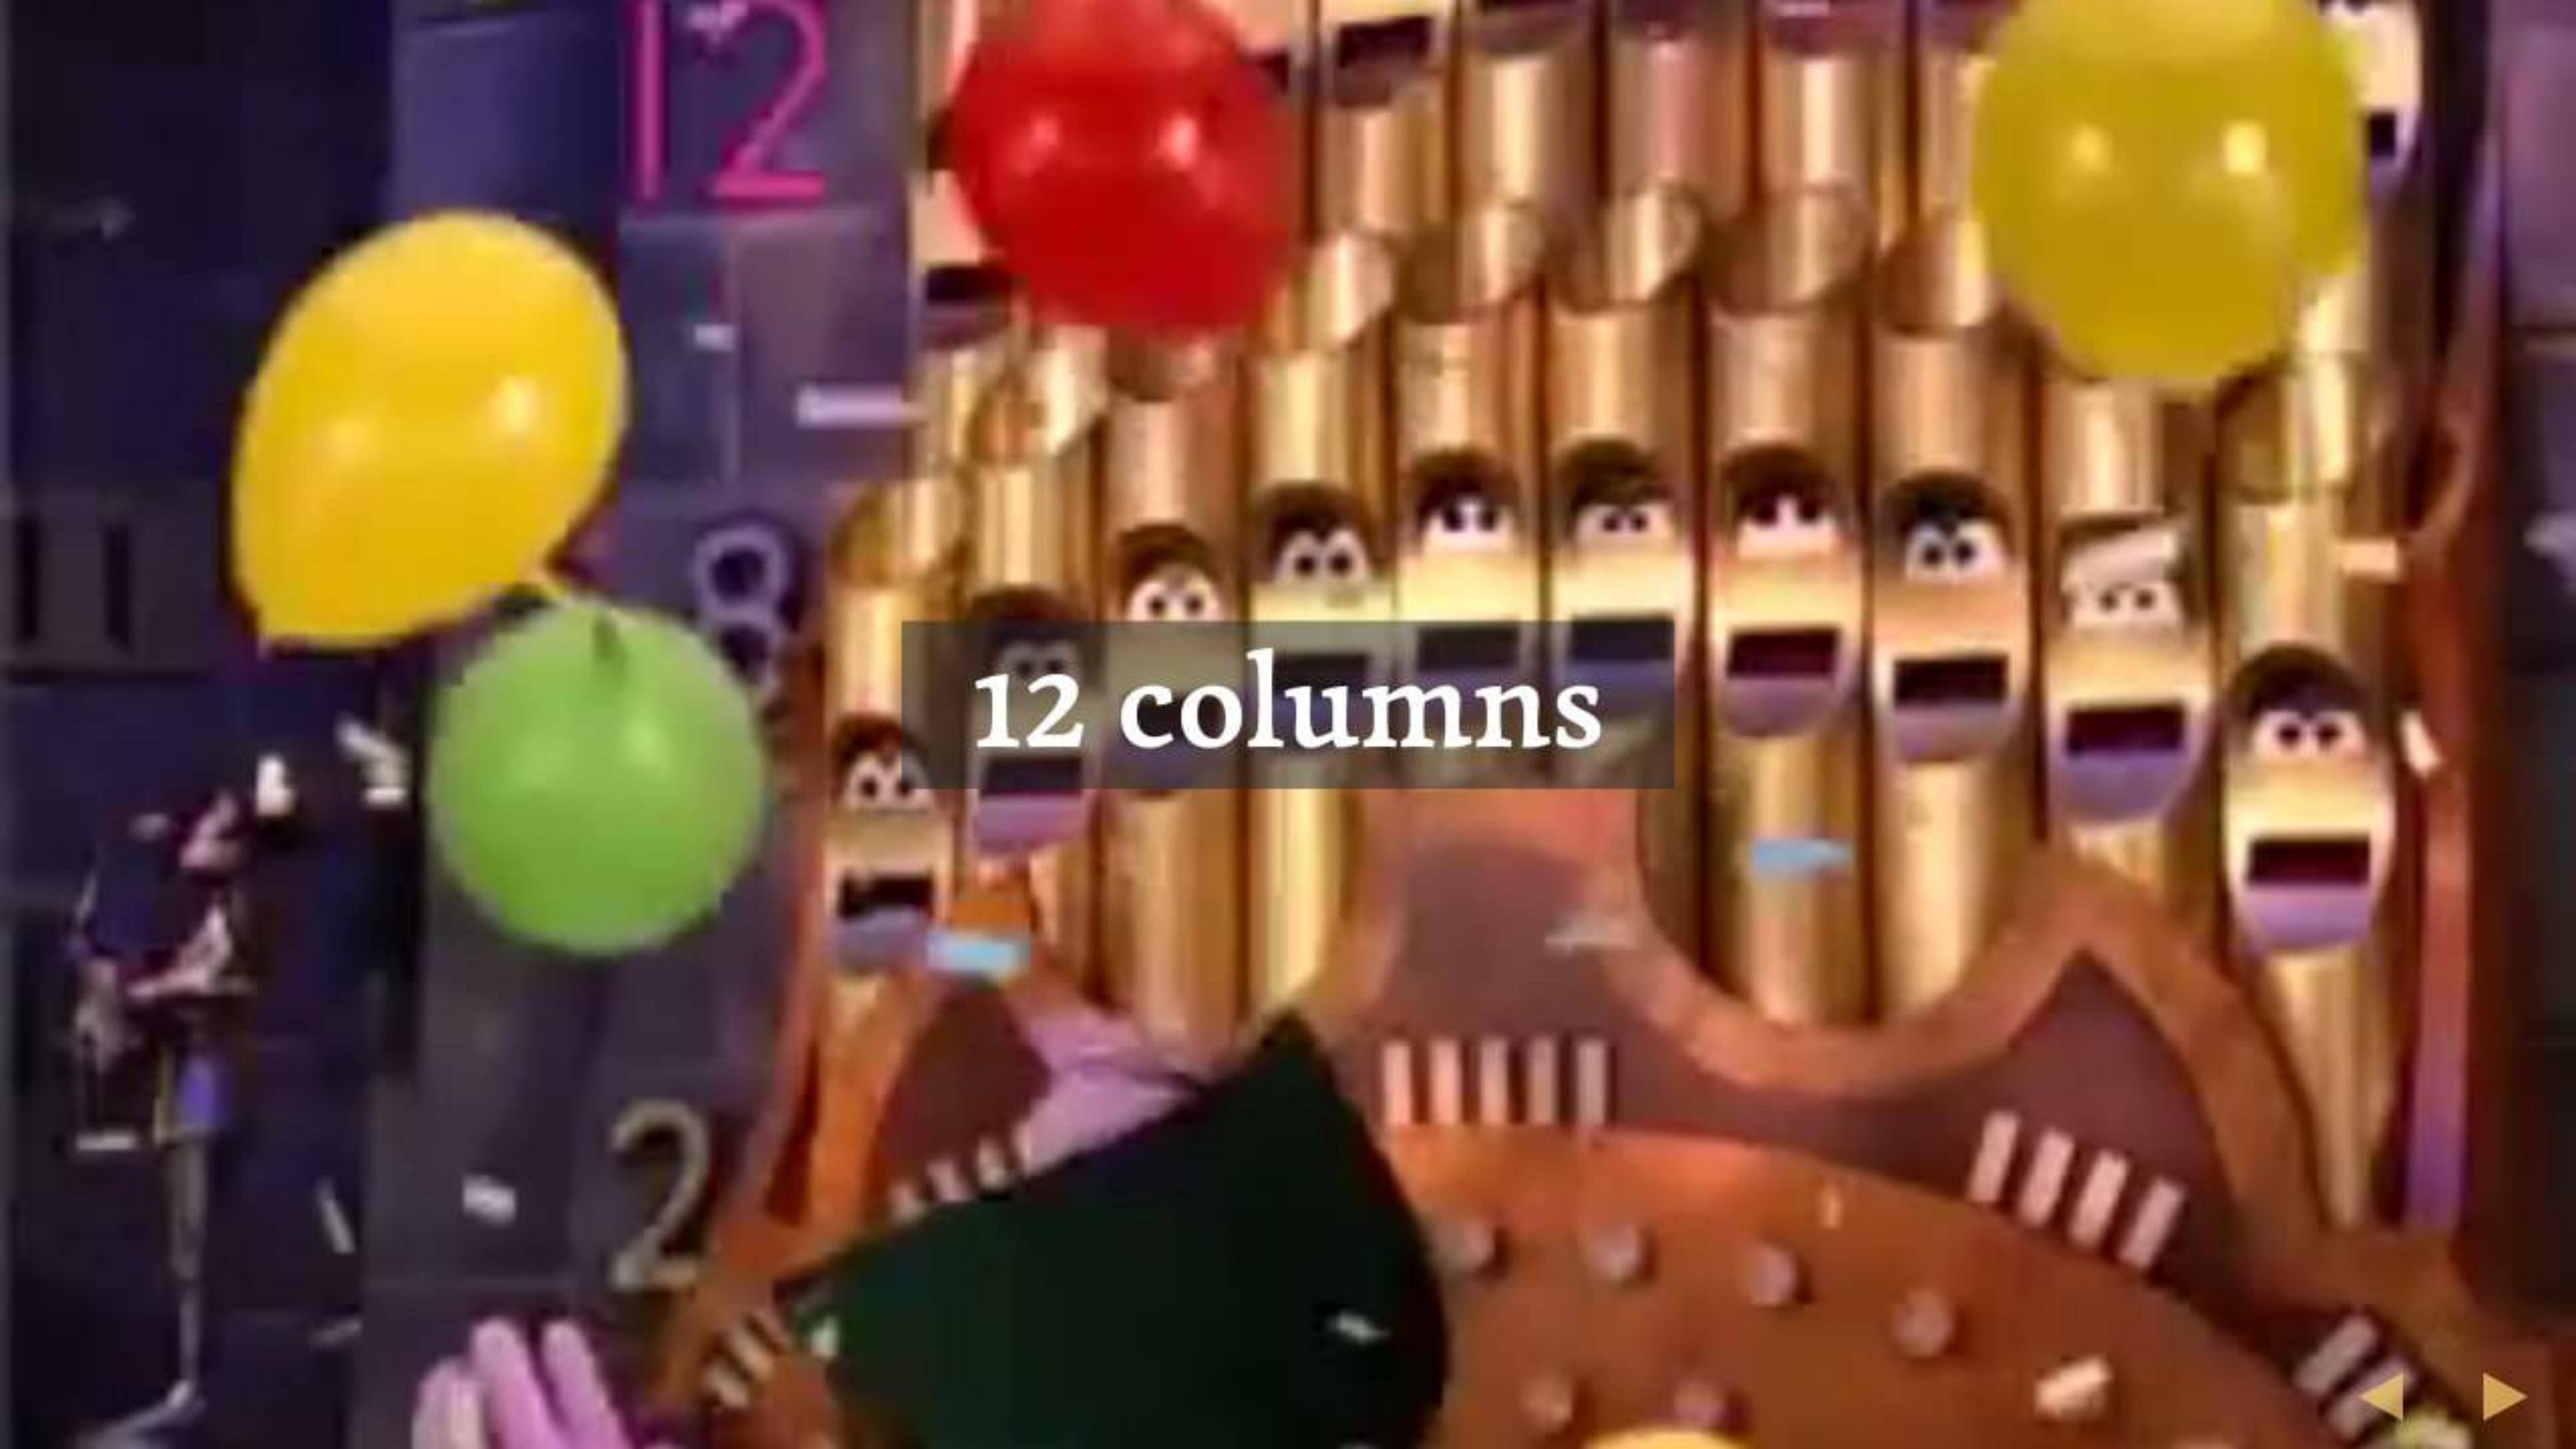

This screenshot shows the eHow website. It features a green header with "eHow" and a search bar. The main content area is divided into several columns: "Today's Top How-To" (with a video thumbnail), "Welcome To eHow" (with a video thumbnail), "Popular How-Tos" (with two video thumbnails), "Top in eHow" (with a list of how-to articles), "Community Chatline" (with a video thumbnail), and "eHow of the Day" (with a video thumbnail). The layout is characterized by its multiple columns and integration of video content.

This screenshot shows the msn.com homepage. It has a green header with "msn" and a search bar. The main content area is divided into three columns: "DROP A DRESS SIZE" (with a woman's face thumbnail), "Today on MSN" (with a woman's face thumbnail), and "Your World" (with a woman's face thumbnail). The right side of the page features a blue sidebar with various links and sections like "Finance", "Health", "Home & Family", "Travel", "Women", "Food", "Tech Support", and "MSN Stores".

# The “Panel” layout

12 columns

A green frog is sitting on a white surface, facing towards the right. To its right is a yellow book with a dark grey rectangular sticker on its cover. The background is a plain, light-colored wall.

# Feature Queries

## CSS Feature Queries

CSS Feature Queries allow authors to condition rules based on whether particular property declarations are supported in CSS using the @supports at rule.

```
.selector {  
    /* Styles that are supported in old browsers */  
}  
  
@supports (property:value) {  
    .selector {  
        /* Styles for browsers that support the specified property */  
    }  
}
```

Data & Decision Sciences.  
Digital Transformation.  
Emerging Technologies.  
Scalable Infrastructure.

The world is more connected than ever before, resulting in an economy and business environment that is constantly changing and evolving. In order to stay competitive, organizations must find innovative ways to meet the needs of their customers and employees. This requires a deep understanding of the latest technologies and trends, as well as the ability to adapt quickly to changes in the market. By investing in innovation, companies can stay ahead of the competition and achieve success in the long run.

Agile Data Science (Part 1) PM&E  
Project management and data science are two fields that have been converging over the past few years. As a result, many organizations are now looking for ways to better manage their data science projects. One way to do this is by using Agile methodologies, which can help teams to work more efficiently and effectively. In this article, we will explore how Agile can be used to manage data science projects, and what benefits it can bring.

What is Data Science? (Part 1) PM&E  
Data science is a field that involves the use of statistical methods, machine learning, and data mining to extract insights from large amounts of data. It is a multidisciplinary field that requires knowledge of statistics, computer science, and domain expertise. In this article, we will introduce the basic concepts of data science and explain how it can be used to solve real-world problems.

Log Management Made Easy in Large-scale Distributed Systems  
In the past, log management was usually a single-point monitoring system that was limited to a specific application or service. However, as systems become more complex and distributed, it has become increasingly difficult to manage logs from multiple sources. To address this challenge, many organizations have turned to log management tools that can handle large volumes of logs from various sources and provide centralized monitoring and analysis. In this article, we will discuss some of the key features of log management tools and how they can help organizations to manage their logs more effectively.

# Flexbox and Grid

Based on the container-child relationship

Flex/Grid container

Flex/Grid item

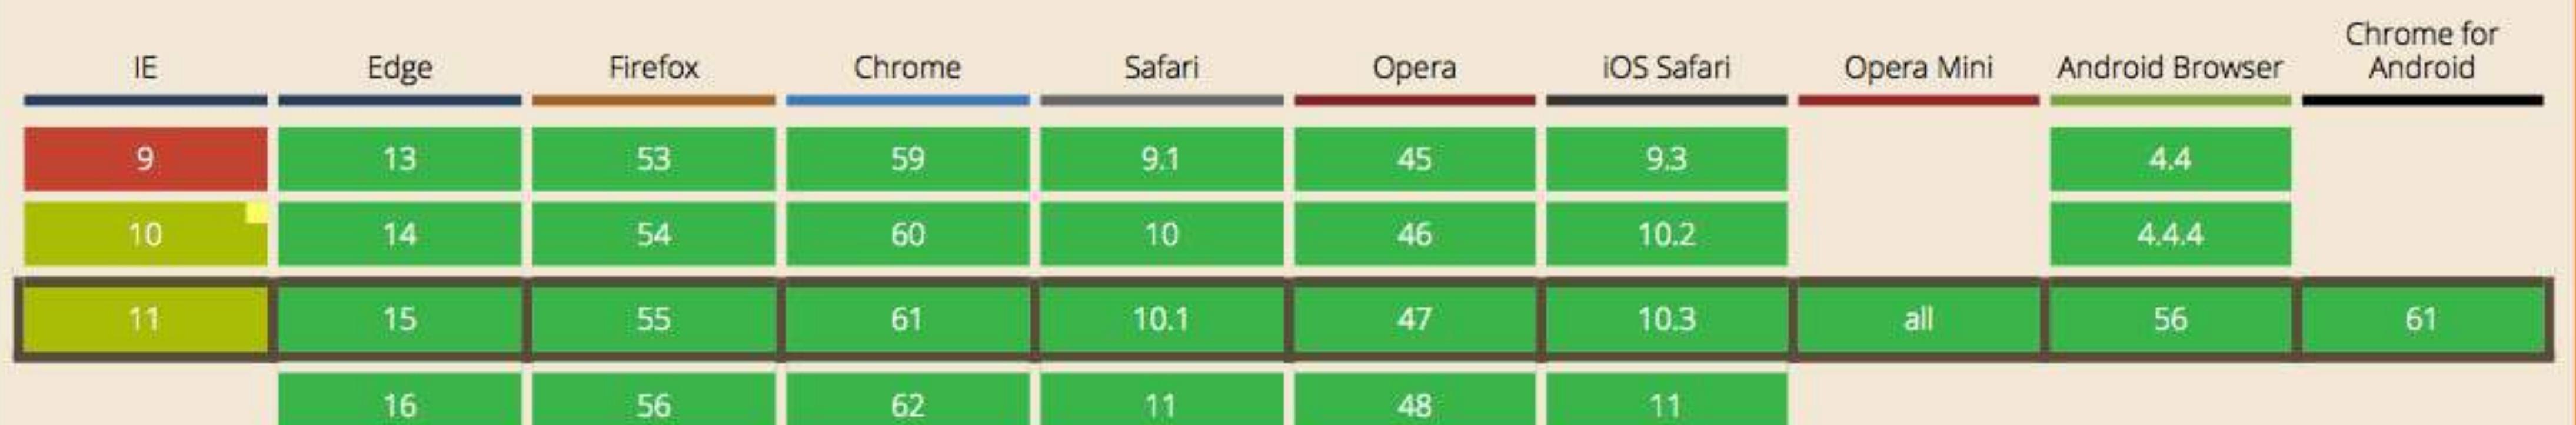

# Flexbox

Provides “simple and powerful tools for distributing space and aligning content in ways that web apps and complex web pages often need.”

# Flexbox browser support

## CSS Flexible Box Layout Module

Method of positioning elements in horizontal or vertical stacks. Support includes all properties prefixed with `flex`, as well as `display: flex`, `display: inline-flex`, `align-content`, `align-items`, `align-self`, `justify-content` and `order`.

✓ Partial Support ✗ Prefixed

Global: 84.52% + 12.11% = 96.63%

# Flexbox basics

```
.flex-cont1 {  
    display: flex;  
    //justify-content:  
    center;  
    //align-items:  
    center;  
    //flex-wrap: wrap;  
}  
  
.flex-cont1 div {  
    border: 1px solid;  
    //margin: auto;  
}  
  
.flex-cont1 p {  
    display: none;  
    border: 1px solid;  
    text-align: center;
```

# Flex shorthand

`flex: initial`

`flex: 0 1 auto`, cannot grow but can shrink when there isn't enough space

`flex: auto`

`flex: 1 1 auto`, can grow and shrink to fit available space

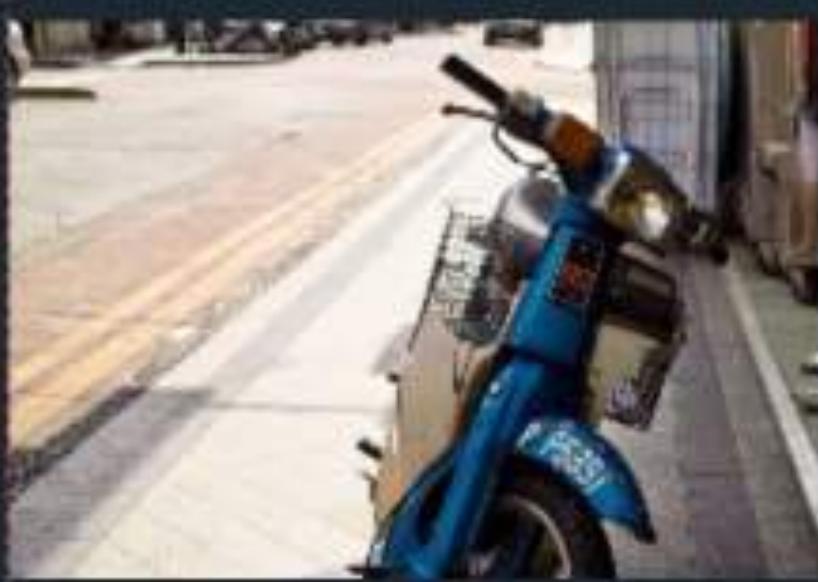

`flex: none`

`flex: 0 0 auto`, cannot grow or shrink, AKA inflexible

`flex: <positive-number>`

`flex: <positive-number> 1 0`, can grow and shrink, extent of growth depends on flex factor

# Flexbox layouts (1/2)

```
.flex-cont2 ul {  
  display: flex;  
  flex-wrap: wrap;  
}
```

```
.flex-cont2 li {  
  flex: 1 0 auto;  
  // border: 1px  
  solid;  
}
```

```
.flex-cont2 img {  
  width: 100%;  
  height: 3em;  
  object-fit: cover;  
  margin: 0.25em 0;  
}
```

# Flexbox layouts (2/2)

```
.flex-cont3 ul {  
    display: flex;  
    flex-wrap: wrap;  
    flex-direction:  
    column;  
    height: 100%;  
}  
  
.flex-cont3 li {  
    //border: 1px  
    solid;  
    flex: auto;  
}  
  
.flex-cont3 img {  
    width: 5em;  
    height: calc(100% -  
    0.5em);  
}
```

# calc() and object-fit browser support

## CSS3 object-fit/object-position [↗](#)

Method of specifying how an object (image or video) should fit inside its box. object-fit options include "contain" (fit according to aspect ratio), "fill" (stretches object to fill) and "cover" (overflows box but maintains ratio), where object-position allows the object to be repositioned like background-image does.

Data from caniuse.com | Embed from caniuse.bitsofco.de

## calc() as CSS unit value [↗](#)

Method of allowing calculated values for length units, i.e. `width: calc(100% - 3em)`

Data from caniuse.com | Embed from caniuse.bitsofco.de

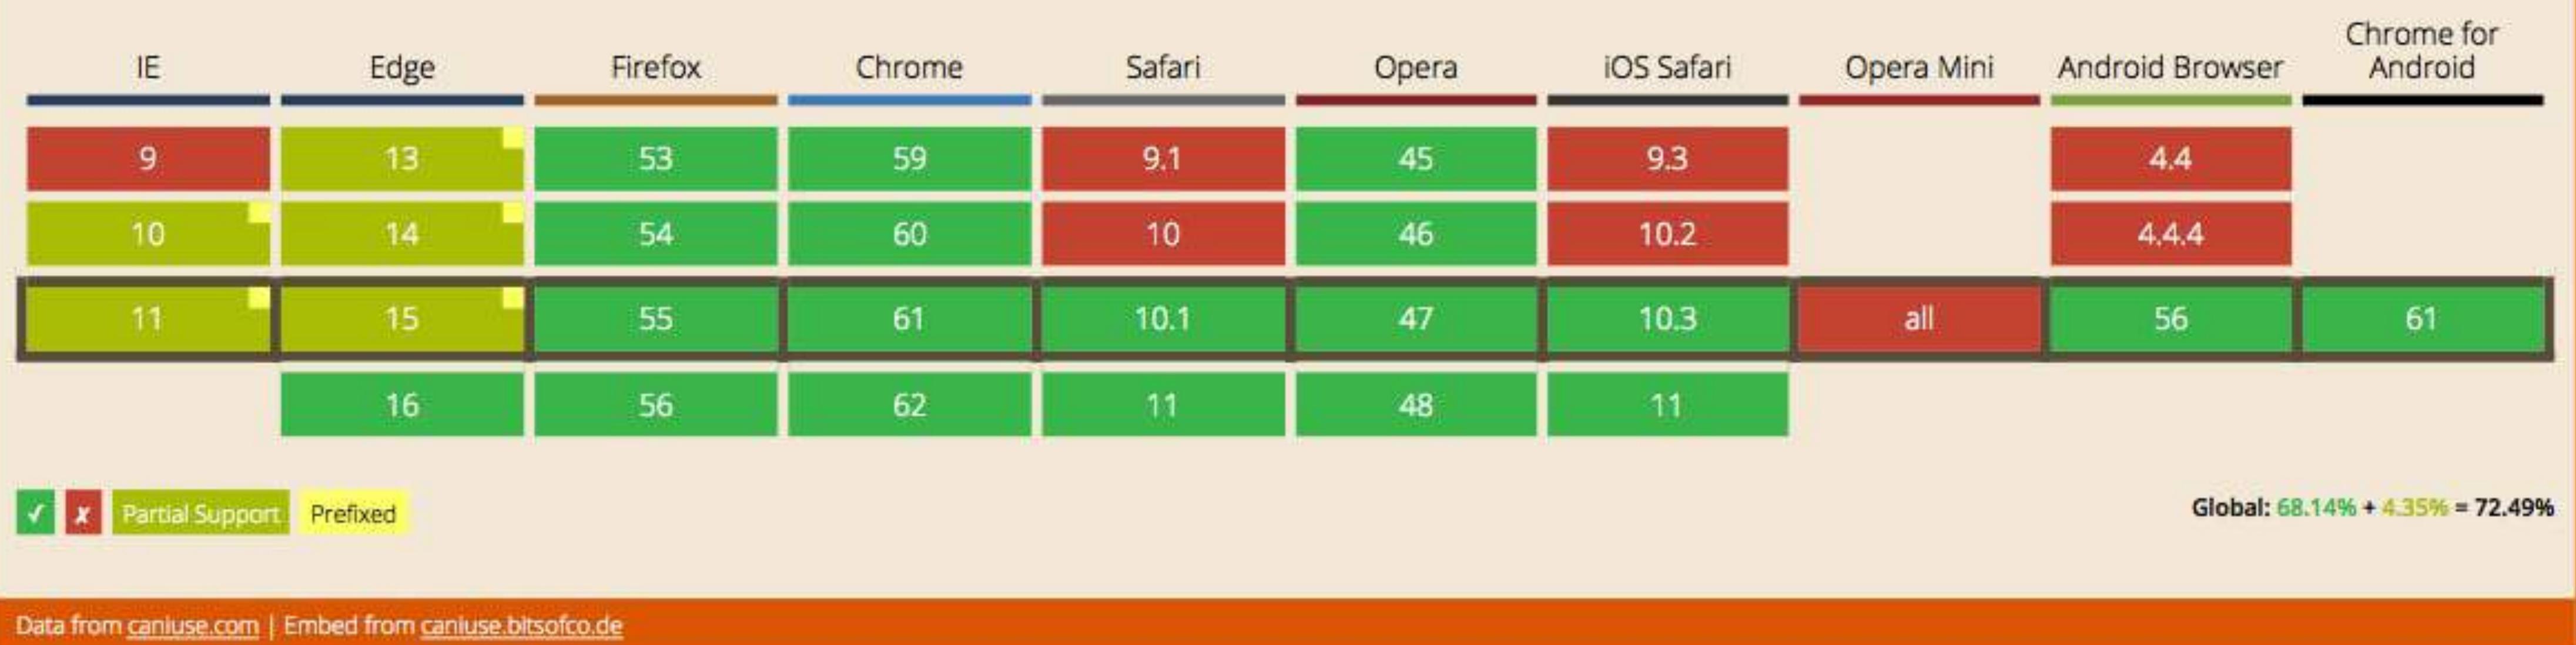

# CSS Grid

**Defines a two-dimensional grid-based layout system,  
optimized for user interface design**

# CSS Grid browser support

## CSS Grid Layout

Method of using a grid concept to lay out content, providing a mechanism for authors to divide available space for layout into columns and rows using a set of predictable sizing behaviors

# CSS grid basics

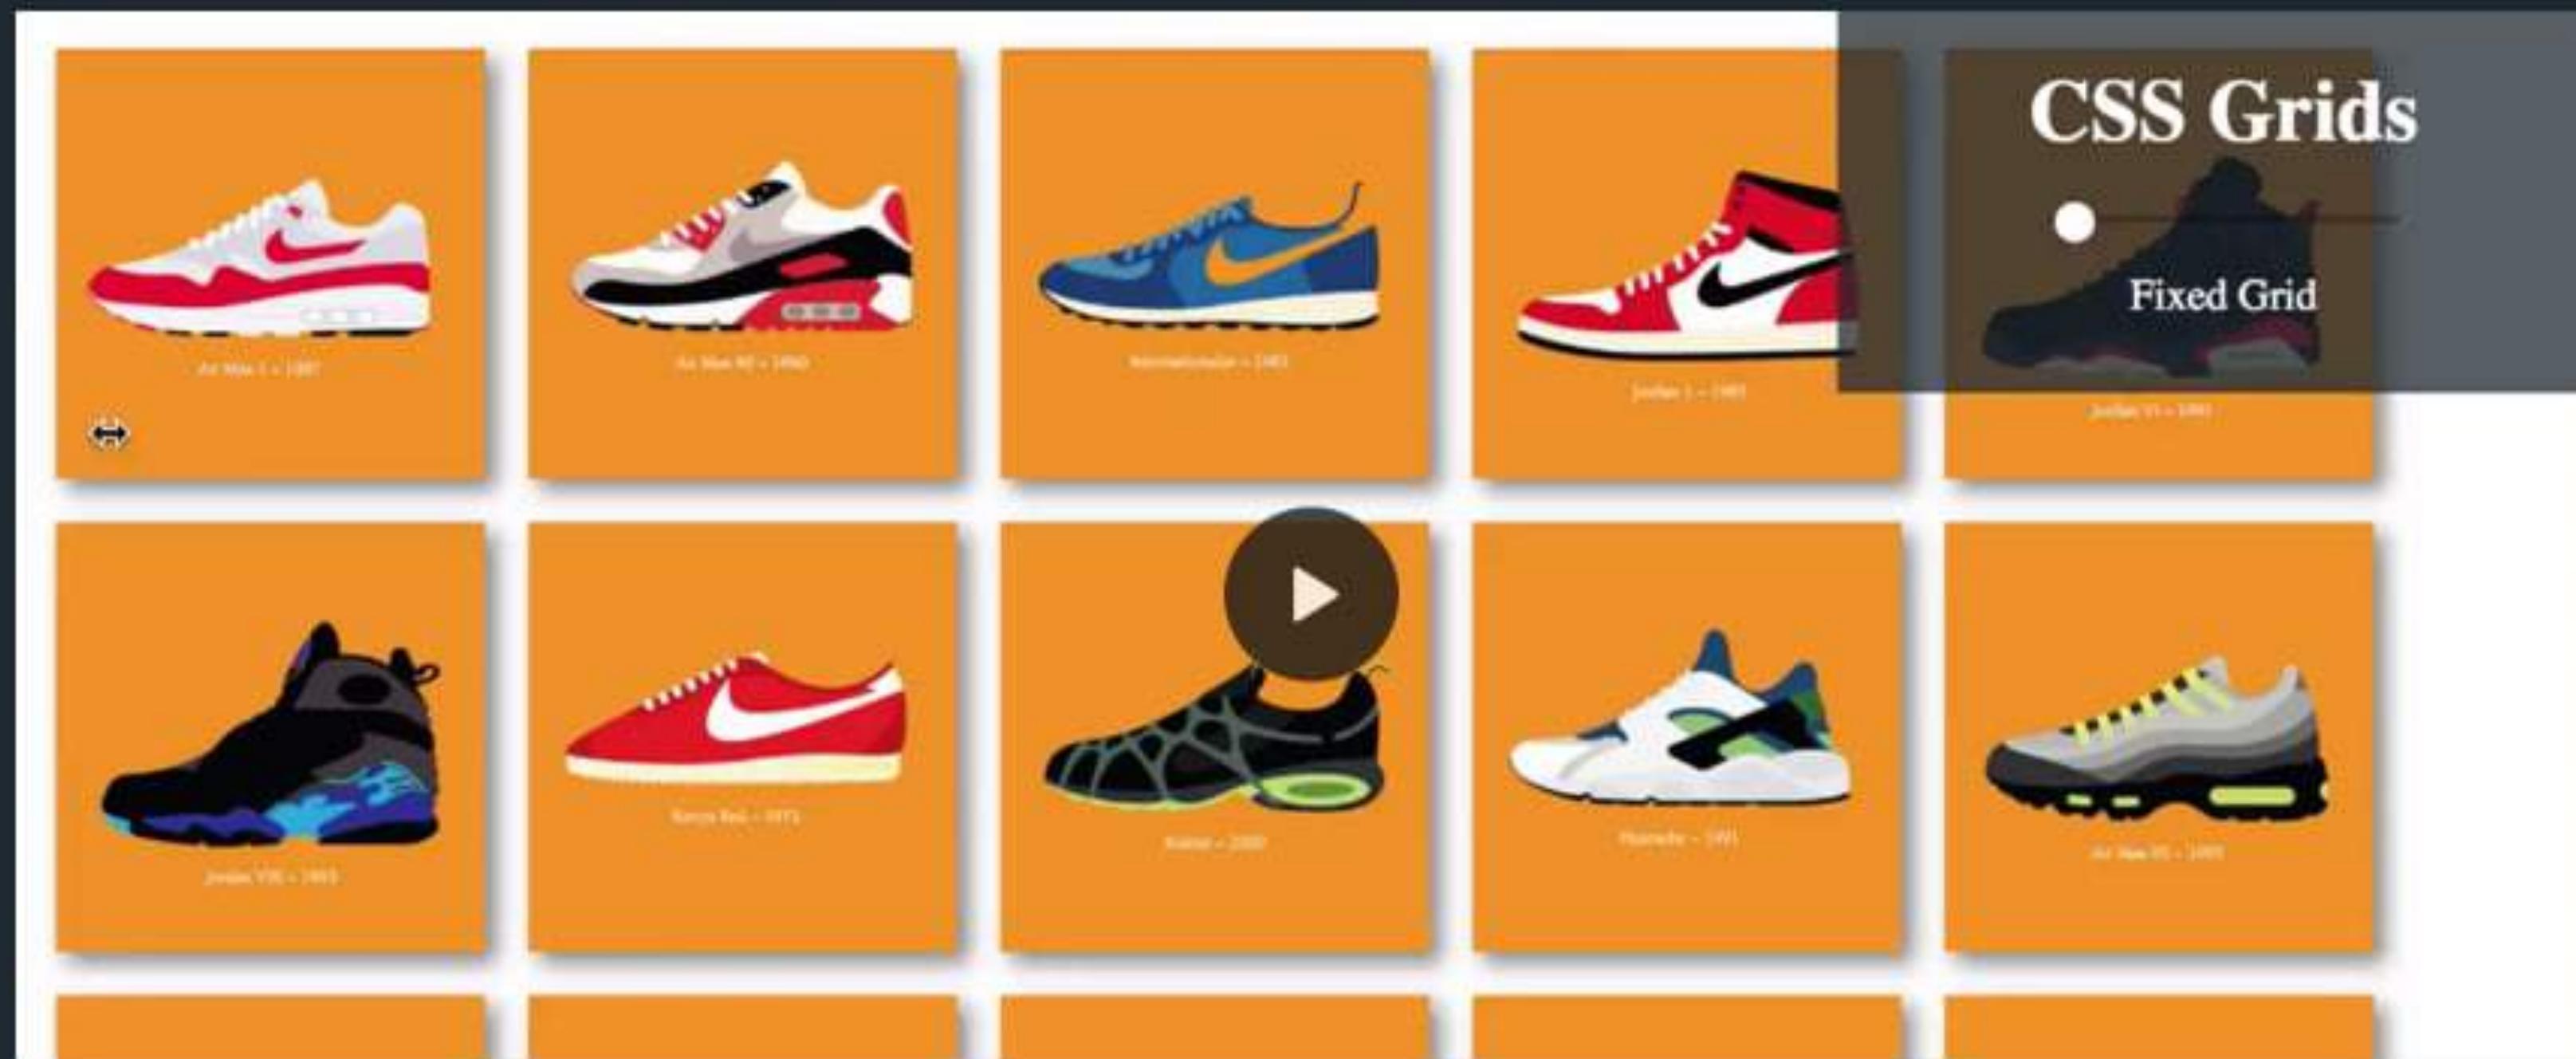

Define your grid.

Place items in the grid.

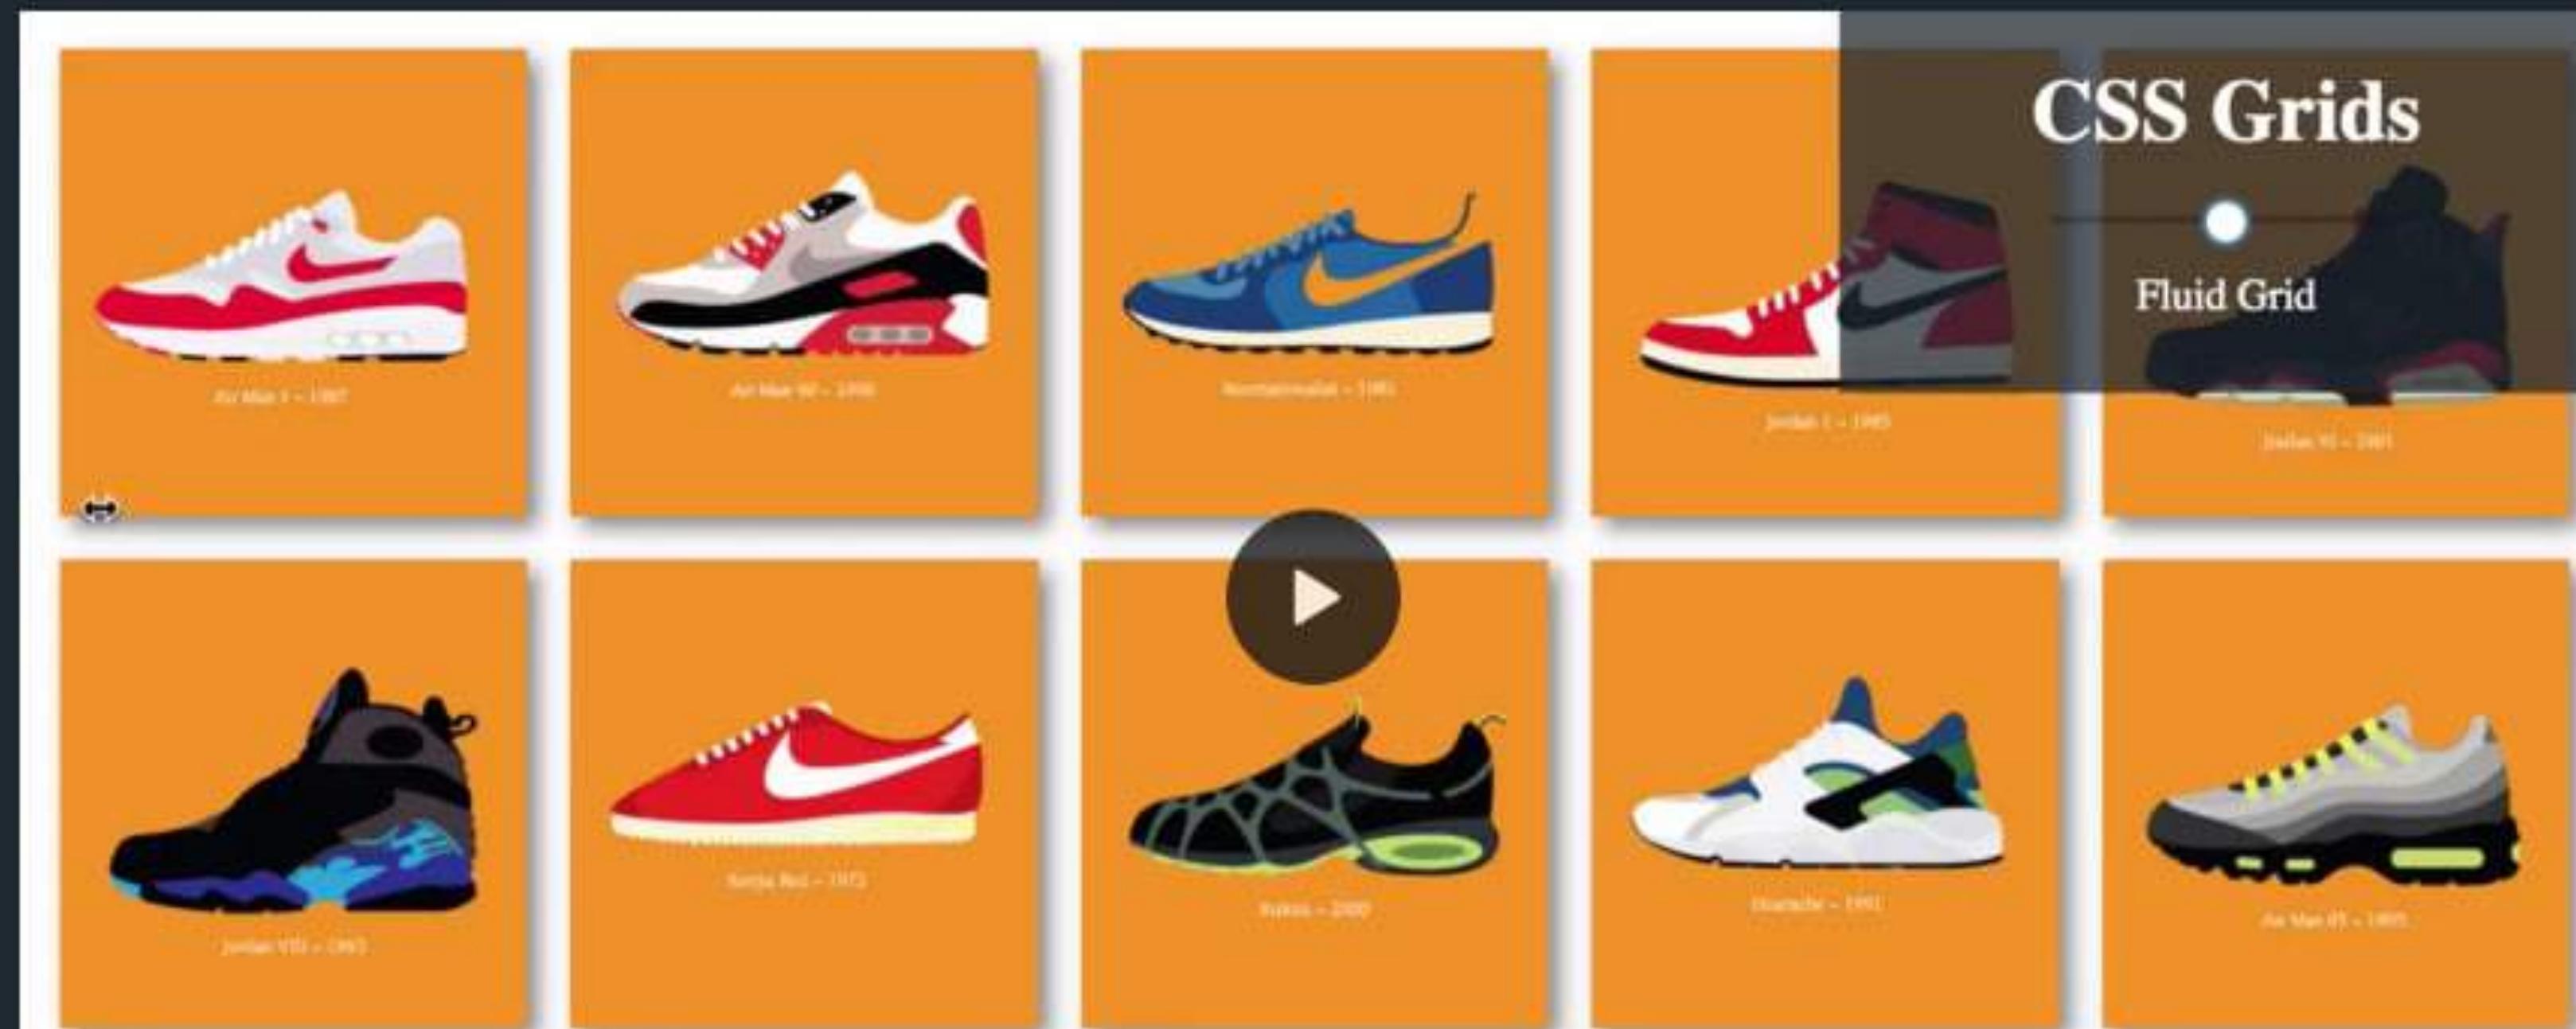

# Fixed CSS grid

```
.container {  
    display: grid;  
    grid-template-columns: repeat(5, 10em);  
}
```

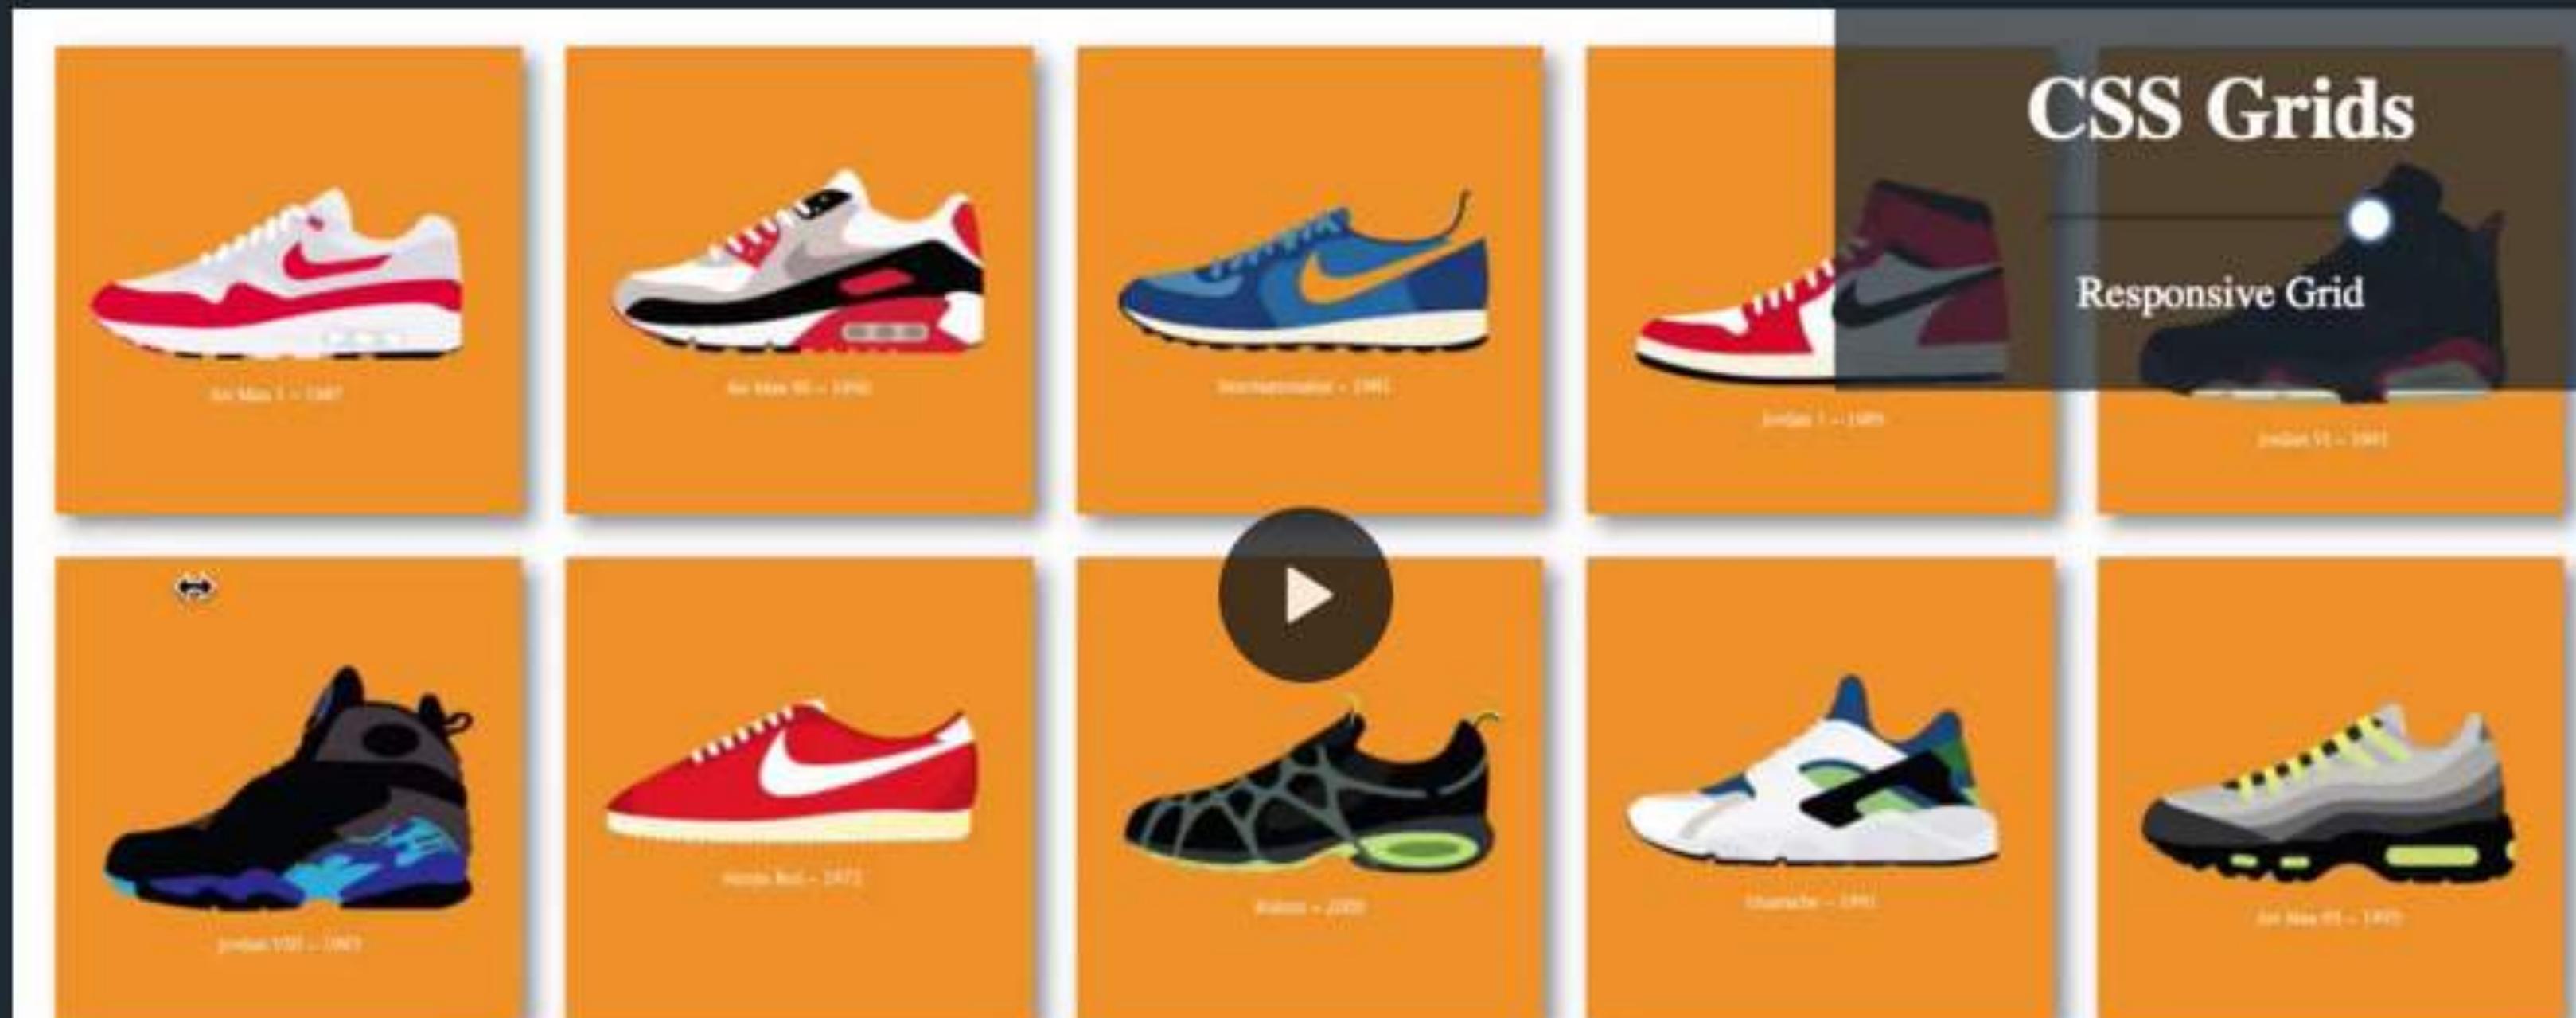

# Fluid CSS grid

```
.container {  
    display: grid;  
    grid-template-columns: repeat(5, 1fr);  
}
```

# Responsive CSS grid

```
.container {  
    display: grid;  
    grid-template-columns: repeat(5, minmax(10em, 1fr));  
}
```

# Placing grid items

`grid-row` and `grid-column`

But books are good only as far as a boy is ready for them. He sometimes gets ready very slowly. You send your child to the schoolmaster, but 'tis the schoolboys who educate him. You send him to the Latin class, but much of his tuition comes, on the way to school, from the shop-windows. You like the strict rules and the long terms; and he finds his best leading in a by-way of his own, and refuses any companions but of his choosing. He hates the grammar and Gradius, and loves guns, fishing-rods, horses, and boats. Well, the boy is right; and you are not fit to direct his bringing up, if your theory leaves out his gymnastic training.

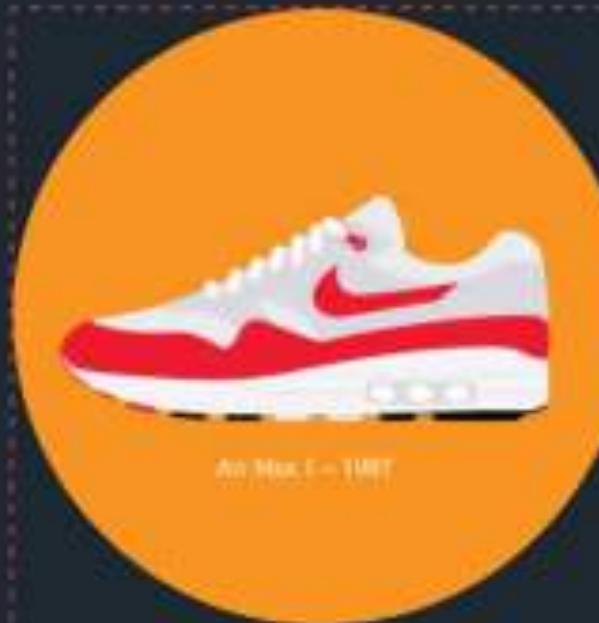

Archery, cricket, gun and fishing-rod, horse and boat, are all educators, liberalizers; and so are dancing, dress, and the street-talk; and,— provided only the boy has resources, and is of a noble and ingenuous strain,— these will not serve him less than the books.

# Firefox Grid Inspector (1/2)

The screenshot shows the Firefox Developer Tools Grid Inspector. At the top, there's a heading "Charles Hayter's Colour Diagrams". Below it is a grid of colored circles. The grid has 22 columns, labeled 1 through 22 at the top. The circles are arranged in several rows: Row 1 has one yellow circle (labeled "yellow"); Row 2 has two red circles (labeled "red") and one yellow circle (labeled "yellow"); Row 3 has one red circle (labeled "red"), one green circle (labeled "yellow"), and one blue circle (labeled "blue"); Row 4 has one orange circle (labeled "orange") and one blue circle (labeled "blue"). The bottom part of the image shows the Firefox DevTools interface with the "Inspector" tab selected. The DOM tree on the left shows the HTML structure:

```
<!DOCTYPE html>
<html lang="en">
  <head></head>
  <body>
    <h1>Charles Hayter's Colour Diagrams</h1>
    <div class="example-wrapper">
      <div class="grid1"></div>
      <div class="grid2"></div>
    </div>
    <div class="axioms"></div>
  </body>
</html>
```

The "grid1" element is highlighted in blue. On the right, the "Rules" panel shows the CSS styles for ".grid1" and ".example-wrapper > \*". The ".grid1" styles include:

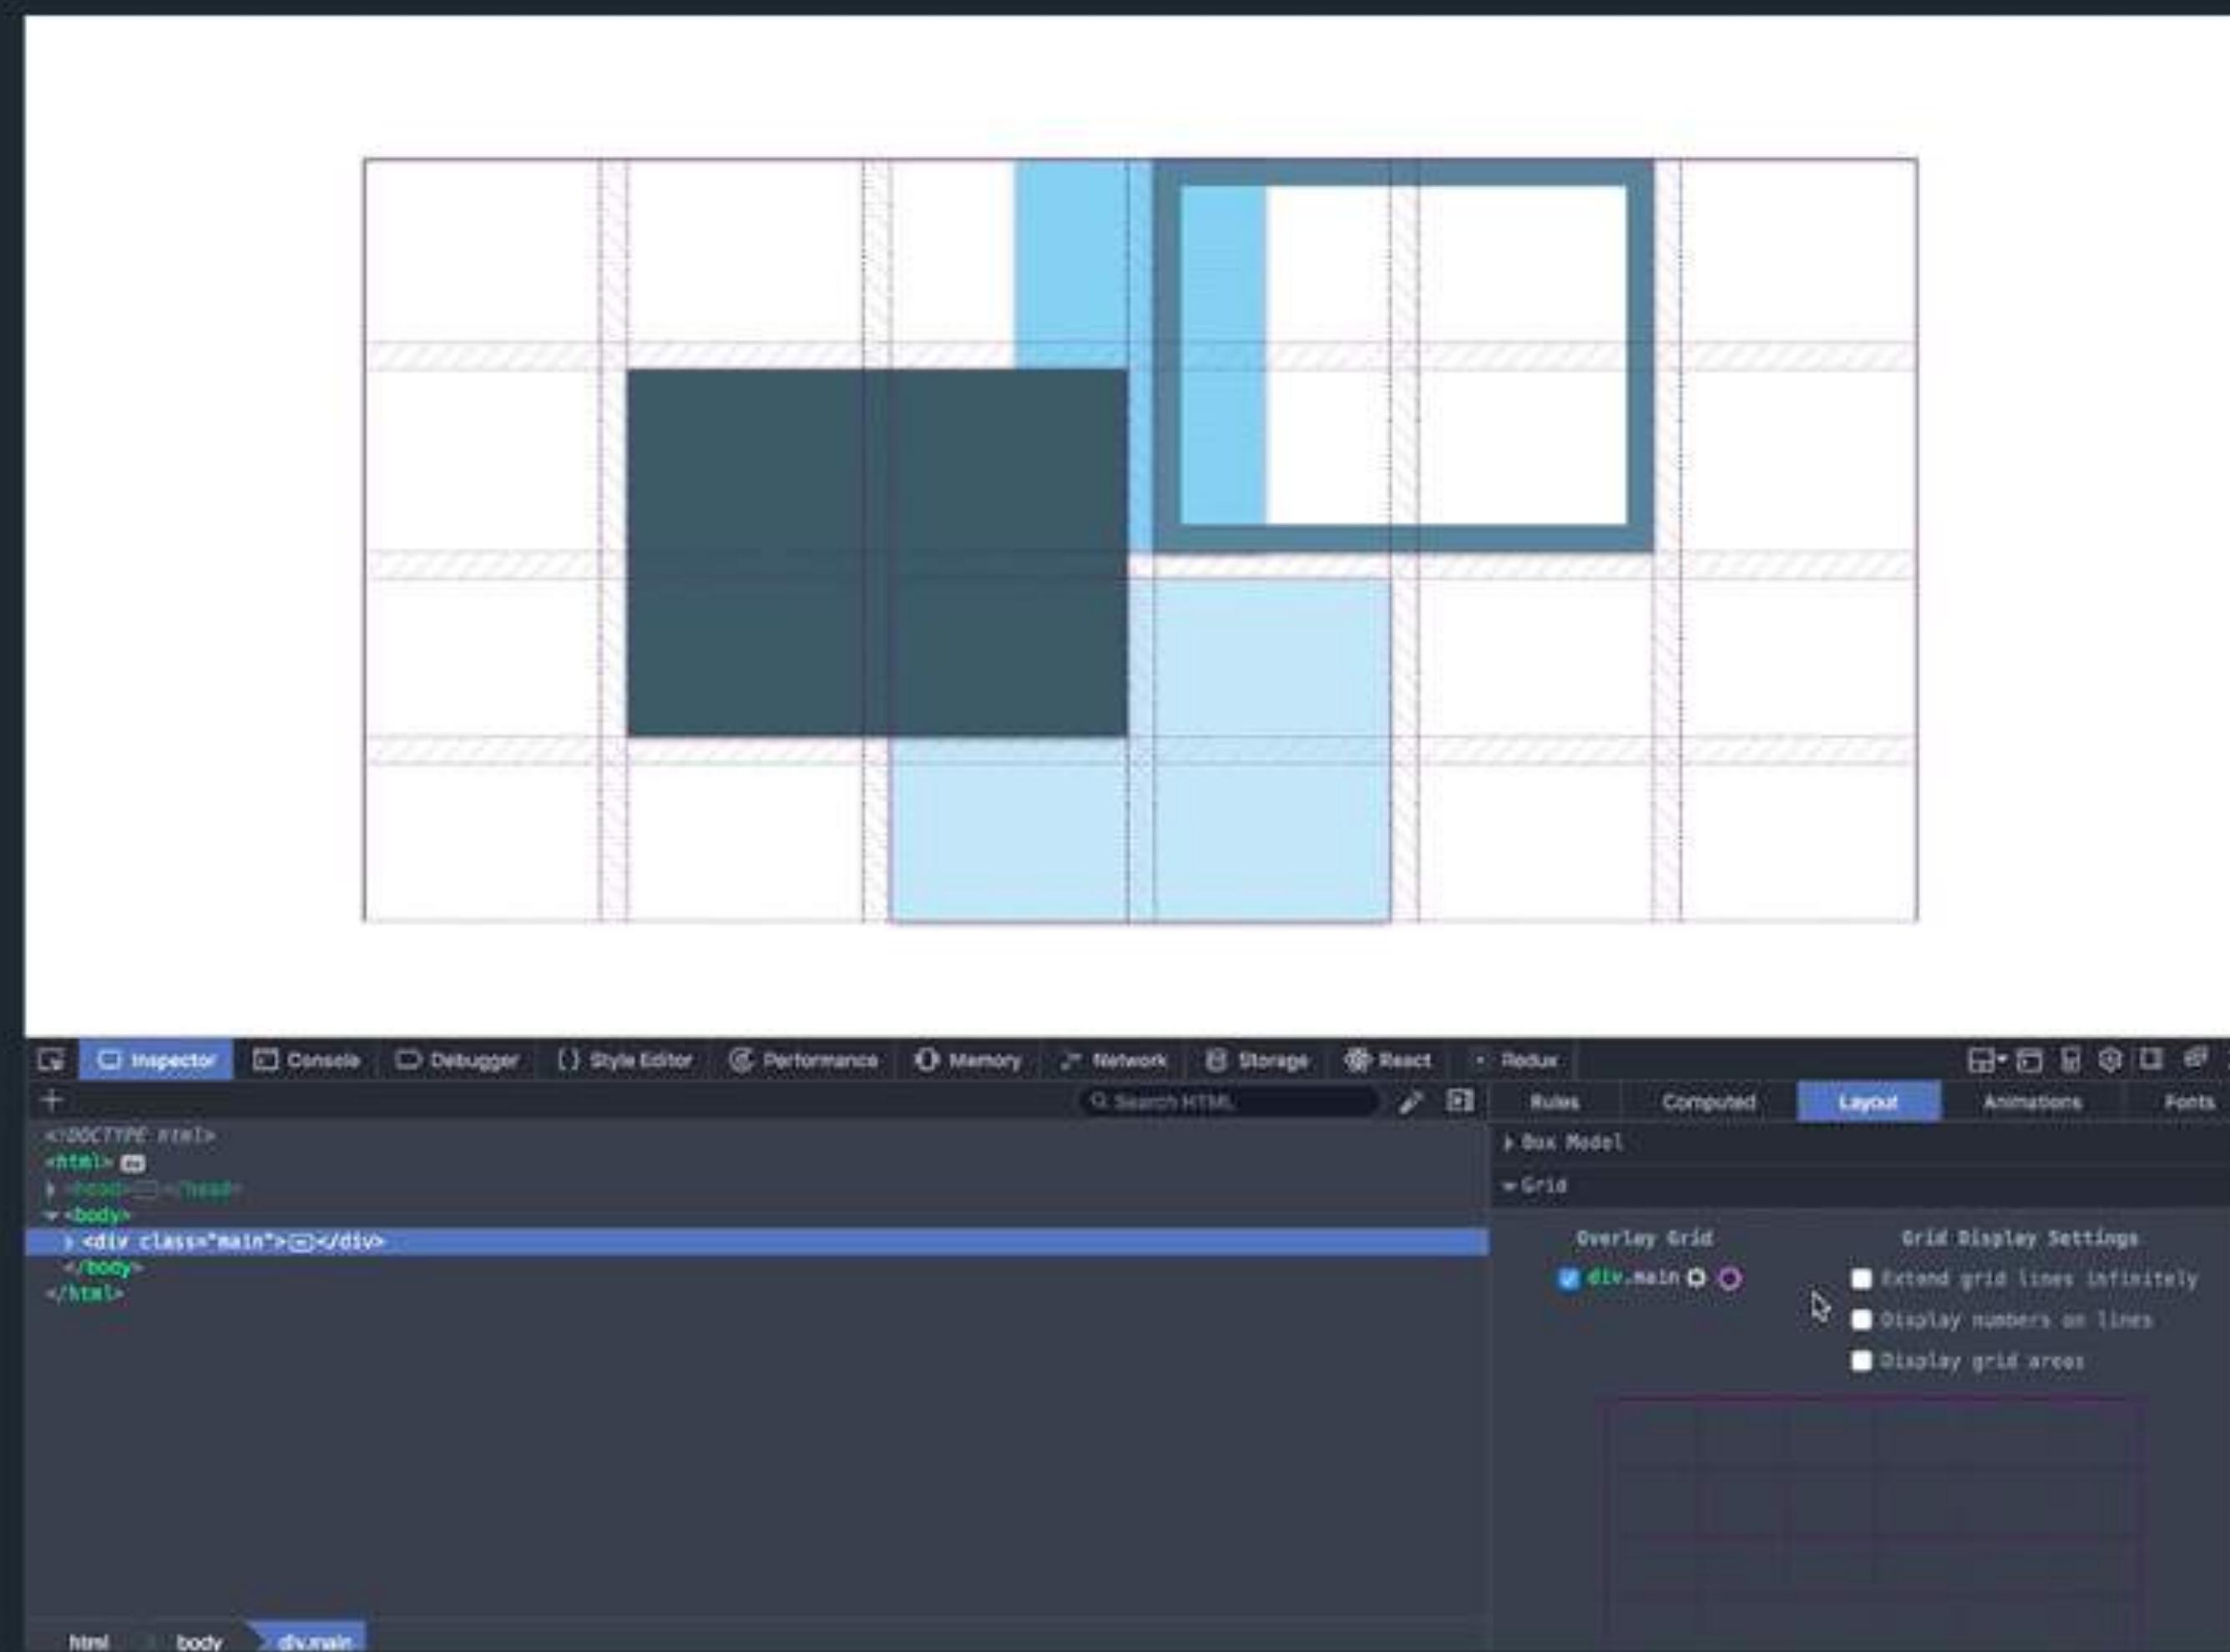

```
.grid1 {
  display: grid;
  -ms-grid-columns: 15vw 5vw 5vw 5vw 5vw 2vw [3] 15vw;
  grid-template: Click to toggle the CSS Grid highlighter 5vw 5vw 5vw 5vw 2vw;
  grid-auto-rows: 15vw;
  grid-gap: 1vw;
  margin-bottom: 1em;
}
```

The ".example-wrapper > \*" styles include:

```
.example-wrapper > * {

## NEW DIRECTIONS IN

# PORTUGAL

AIRES MATEUS – BROTHERS OF INVENTION

PORTUGAL'S IMPRESSIVE CULTURAL AND CREATIVE POTENTIAL WAS FIRST REVEALED TO THE WORLD OF MODERN ARCHITECTURE BY ALVARO SIZA. IN HIS WAKE, A NEW GENERATION OF ARCHITECTS IS EMERGING THAT INCLUDES MANUEL AND FRANCISCO AIRES MATEUS. THEIR WORK IS BOTH STRONGLY INTERNATIONAL AND ROOTED IN ITS PARTICULAR PLACE.

BY BRIAN CARTER · PHOTOGRAPHY BY DANIEL MALHÃO

Manuel and Francisco Aires Mateus are brothers who, after studying architecture at the Technical University in Lisbon, while still in their mid-twenties went on to establish a studio together in 1980. Their growing practice occupies two studios in the heart of Lisbon—one in the renovated shell of a former industrial workshop and the other in a room high up in a collection of houses—where they work collaboratively. With a solid reputation based on designs for houses and successful competition-winning

proposals that have resulted in new buildings in historic settings and impressive landscapes, they are playing an increasingly significant role in the development of new architecture in Portugal.

The thoughtful relationship of building to landscape and the convincing minimalism of their work was recognised by Alvaro Siza and Rafael Moneo, who included projects designed by the Aires Mateus brothers in the exhibition Portuguese-Spanish Encounters in Architecture. Shown first in Lisbon and later in Salamanca in 1999, it was aimed at uncovering the work and ideas of an emerging group of architects that was, as Siza suggested, "free from inhibitions and contradictions typical of tradition."

OPPOSITE PAGE: For this house in Azenhas (2003), a small village just north of Lisbon, Aires Mateus e Associados retained and repaired the ruined walls of a former house, using them as a site within which to construct a completely autonomous new one. The spaces between the old and the new walls were developed as courtyards.

# Transforms browser support

## CSS3 2D Transforms [↗](#)

Method of transforming an element including rotating, scaling, etc. Includes support for `transform` as well as `transform-origin` properties.

Data from caniuse.com | Embed from caniuse.bitsofco.de

## CSS3 3D Transforms [↗](#)

Method of transforming an element in the third dimension using the `transform` property. Includes support for the `perspective` property to set the perspective in z-space and the `backface-visibility` property to toggle display of the reverse side of a 3D-transformed element.

Data from caniuse.com | Embed from caniuse.bitsofco.de

# Editor's LETTER

## EVERGREEN

I'm no Justin Bieber, I go to Aroma to get coffee, and the paparazzi walk me to ballet class. I drink one or two cappuccinos a day. I think that's bad, but I have worse habits. I just gave up smoking because I was deathly ill and couldn't fit the smoke in my lungs. Whiskey is my main indulgence.

**10:00 A.M.** In England, there's no exercise element, whereas in America I start my day—when I have one off—by doing *Ballet Beautiful* with my friend Harley Viera-Newton. In L.A., it's all design for my collection with AG. I'm always traveling for work, and 70 percent of the time I'm jet-lagged. This month I've been in London, Paris, New York, L.A., and back to New York. The past year has been a real learning curve. If my diary doesn't have set things in it, it seems that people on other teams will take advantage of that and I'll split apart. It's the biblical story about how they [threatened to] split the baby in half because they couldn't decide whose it was. I feel like real life is like that.

**11:30 A.M.** When I can I go to Jack's Wife Freda or to the Smile and get scrambled eggs with cheese and avocado. In New York, I'll take cabs, Uber, the subway, or where we're going to a number of different things around the city, I get on the back of my assistant's Vespa. **1:30 P.M.** Realistically, I'm a journalist, but I want to do TV again. Someone said to me the other day: "Name someone who excelled in more than one arena. Alexa, you need to focus on one thing because you can't succeed if you do it simultaneously." I won't allow people to limit what

I do. In the afternoon, I might go back home and do some work. My assistant sends e-mails that say, "from the office of Alexa Chung," but my office is essentially my bed. That sounds really unprofessional, but it's usually just us two in bed cranking out e-mails. I go on *Astrology Zone* once a month, and I love the *Secret Language of Birthdays*. You put in your birthday and it comes back with a survey of people born on that day and their attributes—it's so spot-on, it's insane. I'm a Scorpio and from the Week of Depth I think it just means that

I overthink things, and I'm reflective and dark. **7:00 P.M.** My friend Tennessee Thomas has a shop called the Deep End Club in the East Village, so if I've finished my work I'll stop by. I'll likely be hungry at that point, so I'll pick up a cappuccino and a sandwich from across the road and take it in. I have a close group of friends, and if I invite one somewhere, I know that they'll invite the rest. I'm out every night with them—I don't like doing it for work. Half my life is spent at a dive bar and half is spent at, like, a Valentino dinner. Usually I'm lamenting that my shoes are ill-fitting. Last night I went to karaoke, but I can't talk about it anymore because I've become like a caricature. I went a number of times a week for about a year. When I like something I become obsessed with it, even, like, string cheese. Right now it's Lindt chocolate balls. **10:00 A.M.** I come home, get some water, wash my teeth and face, get into bed, and fall asleep. I always sleep naked. I'd like to be in bed with a boy at 10 p.m., but that's not what happens. **As told to Christine Whitney**

## THE TROUBLE WITH

When the prices of oil soared in the 1970s, consumers around the world rallied against high fuel prices. The Gulf states only braced. The massive windfall saw government revenues swell, in some cases by manifold and more in the space of a few years. Oil, which had represented just seven per cent of world trade in 1970, reached 21 per cent ten years later—a huge redistribution of global income to oil producers. It was to short lived, as oil prices tumbled in the '80s. This forced governments—which had used little of the boozed revenues—to aggressively tighten fiscal policy. Saudi Arabia cut capital spending by 90 per cent from peak to trough.

With oil prices deflating since the start of 2015—dipping dramatically for a second time from the beginning of July since again the Gulf faces fiscal deficits and spending cuts, which will impact oil growth in the non-oil sector. There are

some indications that, this time, things are different. High savings will allow most governments to maintain relatively generous spending levels, at least for the medium term, and there are signs that they're willing to wind back costly public spending, most notably the UAE's move in July to end fuel subsidies.

Is the situation really that different though? The region's dependence on oil is once more in sharp focus. States exporting a single commodity with a volatile price are not masters of their own economic destiny. Broader diversification would help insulate the non-oil economy from price shocks, could provide alternative revenue sources for governments, and offer a wider range of private jobs for citizens at a time when youth unemployment in the region is considerable. Though diversification has been a major plank of economic policy for gov-

ernments since the 1970s, only the UAE—and particularly Dubai—has made significant progress. A survey of opinions among economists, academics and industry professionals yields the view that progress elsewhere in the Gulf has been "slow", "inconsistent", and even "a mirage".

To top it off, the most commonly used measure of diversification—the growth of non-oil sectors in the GDP—may tell us little about it. This metric can be deceptive since the high growth rates witnessed in recent years can be linked to the recycling of oil revenues through the economy, says Paul Hasenov, an IMF economist based in Washington. That becomes apparent when you compare the economies of Bahrain and Singapore. In both you'll see diverse GDP structures, with a mix of oil and non-oil sectors. But cut to their export structure and the difference is stark. While Singapore has a broad mix—machinery and transport

equipment, refined hydrocarbons and manufactured goods—in Bahrain's case 79 per cent of exports are oil, while an additional 16 per cent are metals and aluminium.

Across the Gulf, non-oil exports have grown from 13 to 30 per cent of non-oil GDP across 2000 to 2013, according to IMF figures. But at the same time, export quality and export product diversification have stagnated. Much of the growth has come in capital intensive sectors—fertilisers, chemicals and metals—where investment tends to be state driven and centrally planned.

Global experience shows that growing non-energy exports in a commodity exporting economy is difficult because energy revenues have a distorting effect. After the Netherlands began exploiting the major Groningen gas field in 1999, its currency rose as did wages in the service sector, reducing the competitiveness of its export sectors, including manufacturing. This

became known as the "Dutch Disease". With pegged currencies and low wages, the Dutch Disease affects the Gulf differently. Simply, the recycling of oil money crowds out development of the non-oil export sector.

If left unchecked, Gulf states face missed chances for growth and ultimately a decline in living standards. Diversifying from its current level to the OECD benchmark would increase GCC GDP by 16 per cent, worth \$17.7 billion per year, according to EY, equivalent to more than three quarters of the foreign direct investment (FDI) flow into the bloc in 2013. "No country wants to slide, and let other countries grow while you relatively stagnate," says Hasenov.

Look around the globe for diversification success stories and there are only a

handful, such as Mexico, Indonesia, and Malaysia, which developed industry clusters before oil exports dropped. Hasenov and his colleague Reza Cherif have co-authored a number of IMF discussion papers on diversification in the Gulf; neither their papers nor their comments represent the official IMF line. They say that preparing the ground early is crucial, since it's not easy to quickly develop a non-oil tradable sector—made up of goods and services, typically high value, which companies can export—in addition to oil. "It takes a long time, decades probably."

The Gulf has made huge strides in infrastructure and human development indicators such as education and health care, but while these investments are a precondition for diversification to take place, they don't guarantee it will. Roads, highways and ports can be used for activities such as imports and food delivery rather than for growing exports.

```

showcase CSS shapes' capabilities. Point is, with CSS shapes, it's totally possible to have text wrap around Beyoncé's elbow.

`img.shape` | 307.34x532.81

To be honest, the W3C spec is not that easy to understand, so here's my attempt at explaining it in plain English. A prerequisite for applying a CSS shape property to an element is that the element must be floated. It doesn't work on non-floated elements.

If the browser you're using right now supports CSS shapes, you should see text wrapping nicely around the image of Bruce Lee, otherwise you'll just see the standard rectangular column of text. (Hint: Try using Chrome or Safari)

There are 4 basic shape functions you can use to define an element's shape, in other words, how you want the text to flow around your element. In addition to that, you can also extract a shape from images with an alpha channel.

**SIDE EFFECTS**  
from pollution, from the  
quilted gray air hanging over L.A. to the  
slowing rate in asthma, can be seriously unpleas-  
ant. Now the latest research shows that pollution is also  
aging our skin. The culprit: an increase in minute particles  
and liquid droplets of pollution in the air so tiny that they lodge  
in pores. "These environmental impurities destroy skin's natural  
oil, which acts as a protective barrier," says New York dermatologist  
Dennis Gross. "That leaves skin exposed to free radicals and leads to  
collagen breakdown, aging, cell damage, wrinkles, and irritation." These  
toxins also create a physical barrier that prevents intensive products  
from penetrating. And no one, from the Hampton to Hampstead, is  
immune. According to one recent study, more than 80 percent of  
the world's population now breathes polluted air that exceeds  
the World Health Organization's air-quality guide-  
lines. "Pollution speeds up the development of  
lines, wrinkles, and dark spots," says New  
York dermatologist Joshua  
Zeichner, "and it  
**WASH  
YOUR  
FACE**  
may also  
contribute to  
the development of skin  
cancers. That's why it's so important  
to cleanse in a way that removes the particulate  
matter from your pores." Those on beauty's front lines  
agree. "If you don't wash your face properly before bed, you are  
not allowing skin's natural repair process to take place," says Joanna Vargas,  
a facialist to radiant A-listers like Michelle Williams. "I guarantee you will wake  
up to puffy eyes, darker circles, breakouts, and less elasticity." Luckily there are an  
increasing number of options, from organic balms to ever more advanced sonic cleaning  
brushes, that get even the tiniest particle out while leaving skin glowing—and more  
responsive to antiaging serums. Choosing the right method depends on skin type and preference. Among the latest innovations is micellar technology, which enables cleaners to act as  
makeup remover and toner in one. "Micellar water has droplets, usually oil, suspended in  
it that help to grab on to debris and wash it away," explains Elizabeth Tanen, a Washington,  
D.C., dermatologist. The cleaners, which contain no soap or irritants, are applied to  
dry skin and wiped off with a cotton ball, making them ideal for sensitive types. Try  
La Roche-Posay Physiological Micelle Solution (\$21) or Avène Micellar Lotion  
Cleanser (\$20). Cleansing balms, with a rich texture that melts on contact,  
have a large cult following. "They are particularly good for dry or aging  
complexions," says Amanda Lacey, an in-demand London facialist.  
"Water a teaspoonful of balm in your hands, massage  
it in, and then remove it with a damp cloth for  
gentle exfoliation." The balm spreads in

## BEAUTY Talk

### ENIGMA DARIA

45 Minuten Verzögerung, Nasepiercing, schwarz-weiß gestreifte Jeansleggings und ein zerchilisches T-Shirt, Daria Werbowy schlendert gelassen, ohr geblasen, ins Pariser Fotostudio. Die 29-jährige Kanadierin, Tochter polnisch-ukrainischer Immigranten, ist eines der gefragtesten Models der Welt. Ihren Durchbruch als Bild der *sexy blonde* schaffte sie mit der Prada-Kampagne im Herbst 2003, als neues Gesicht von Lancôme wurde sie dann zwei Jahre später zum Superstar. Daria sitzt entspannt in der Maske, einen Fuß, den mit dem Schlangen-Tattoo, in Schall der Make-up-Assistentin. Sie erzählt, was sie in Paris kulinarisch auf keinen Fall auslassen wird: „Ich habe eine Obsession für Schnecken. Im Ô Chateau schmecken sie definitiv am besten.“ Zu Hause in ihrem New Yorker Loft an der Lower East Side hat sie immer ein paar Dosen von Dean & DeLuca im Schrank. Wenn es mittags schnell gehen muss, gibt es Schokokekse mit Brot. Mindestens zwölf, gern auch mehr. „Gerade für Frauen sind die gut wegen des hohen Einnahmen.“ Noch mehr ungewöhnliche Beauty-Tipps gefällig von der Frau, deren Gliedmaßen sich ziemlich perfekt auf 1,80 Meter verteilen und die dabei das muskulöse Kreuz einer Seglerin besitzen? „Zum Müsli gebe ich einen Mix aus Zitronen, Honig, Ingwer und Kurkuma. Reinigt das Blut und kurbelt den Stoffwechsel an. Außerdem versuche ich, mehr grünen Tee als Kaffee zu trinken.“ Zeitmanagement und Organisation gehören nicht zu ihren Stärken, was Nicolas mit einem resignierten Schulterzucken bestätigt. Er ist ihr Agent bei IMG Models in Paris und folgt der Starsbeauty wie ein Schatten. „Mein Telefon ist immer auf lautlos eingestellt, es vibriert nicht.“

einmal. Ich vernehme incisive SMS. Um nicht alles zu vergessen, mache ich mir Listen, auf Papierservietten, auf Magazintiteln, im iPhone.“ Daria Werbowy ist der Transboy unter den Supermodels, trägt privat kein Make-up, führt mit ihrem Bianchi-Rennrad zum Ashtanga-Yoga (Gruppenkurs, kein Privatlehrer) und mit einem alten Opel Kadett durch Irland, wo sie ein kleines Cottage am Meer besitzt. Überhaupt, die Meer: Regelmäßig kleidet sie sich aus und schwimmt durch die Welt, die Seegesetz besteht dann aus Freunden und Familie. „Für mich gibt es nichts Besseres, als wochenlang dasselbe T-Shirt anzuhaben, die Haare nicht zu bürsten und mit der Natur zu leben. Segeln ist für mich Adrenalin, eine ständige Hemusförderung und vor allem die schlauste Möglichkeit, alles hinter mir zu lassen.“ *Janoska Marr*

# The CSS Layout Workshop

Learn CSS layout with straightforward and practical examples. A course designed to remove layout confusion for good!

## Does this sound familiar?

“

I love designing a site, but then find I have to compromise the design when it comes to building it with CSS.

“

My approach to building layouts is to try things, reload and see what happens.

“

I use a framework to do my layouts. I'd love to know what it is really doing under the hood.

“

Once I get my CSS working I'm afraid to make changes in case it all falls apart again!

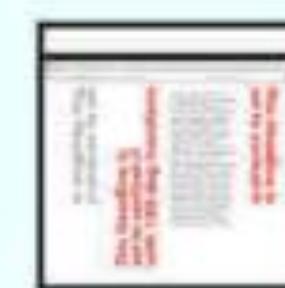

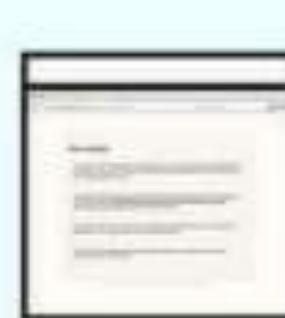

“

I've never really understood why margins collapse.

“
